

FORD TRANSIT CONNECT LWB WALL LINER INSTALLATION INSTRUCTIONS

NOTES:

1. Before commencing, remove all wall liners and “D” Rings already installed in the vehicle.
2. Consult layout PDF and compare vehicle layout allocated Legend.
3. Prepare hardware shown below and have them ready for installation.
4. Wall liners will be installed in the order shown in the instructions.
5. A drill with a Phillips driver is required to install (C) #8 Screws) shown below.
6. Reinstall all “D” Rings once the wall liner kit installation is completed.

Driver Side Wall Liner Installation

Installation completed

1: Install Item 1, 2, Front Driver Side Panels.

Note; Depending on the model of vehicle you have purchased, the panels may be full or partial.

For Dual sliding doors vehicles you will require the partial Upper and Bottom panels.

First remove OEM bottom panel.

Sliding door must be closed to install panel;

- Align notch and edge of panel with the feature on the vehicle driver side front then align opposite side of panel edge with the contour features.
- Install hardware (A) on the Bottom panel, hardware (B,C) on the Upper panel, in the holes provided, on the bottom of the panel first, working your way up the panel to the top.

2: Install Item 14, Rear Driver Side Panel.

Note; Depending on the model of vehicle you have purchased, the panels may be full or partial.

- Align wheel well edge of the panel with the feature on the vehicle; position the contour of the panel to the vehicle wall.
- Install hardware (A), in the holes provided, on the bottom of the panel first, working your way up the panel to the top.

PANEL

B, C

3: Install Item 7 and 8, Upper door panels,

- Align the Upper panels with the upper door contours as well as with the door lock opening.
- Install hardware (B, C), in the holes provided, on the top of the panel first, working your way down the panel to the bottom.

Note; make sure doors are closed for the installation

Installation completed

Passenger Side Wall Liner Installation

Installation completed

4: Install Item 15, Rear Passenger Side Bottom Panel.

Note: Depending on the model of vehicle you have purchased, the panels may be full or partial.

- Align wheel well edge of the panel with the feature on the vehicle; position the contour of the panel to the vehicle wall.
- Install hardware (A), in the holes provided, on the bottom of the panel first, working your way up the panel to the top.

5: Install Item 1, Bottom Sliding Door Panel. First remove OEM bottom panel.

Note: Sliding door must be closed to install panel;

- Insert panel into the sliding door sill cavity, align holes at the bottom half of the panel to the one on the door and insert hardware (A) in all of the holes.
- Install Item 2, Sliding Door Top Panel with hardware (B, C) in the holes provided.

Ceiling Liner Installation

6: Install Item 9, Ceiling Panel.

- Before starting bend the scribed edges on the panel shown above to help in the installation.
- Align Ceiling panel with the feature on the vehicle in the front, insert the front of the panel between the headliner and the roof.
- Align the outside holes at the center of the panel with the holes in the ceiling cross bows and install hardware (A) on each side; this will align the panel with the ceiling.
- Push the panel against the ceiling and install hardware (A), in the holes provided.
