

Exclusive Accelerators

Add-ons for Rapid Time to Value / Efficient Application Management

Winshuttle products are robust and can solve a myriad of business issues. Like an iPhone, there are many built in features that are fantastic, but the Apps are what make the iPhone so cool. CPS's Winshuttle Accelerators are the Gold standard for add ons to Winshuttle products and support. CPS helps Winshuttle customers rapidly find value in their investment for Mass Data or MDM Workflow.

NEW

NPD / ECO / MDM

CPS Engineering / MDM Accelerators are viable ways to fast-track Customer, Vendor, Material, Engineering Change Operations (ECO), New Product Development (NPD) and Engineer to Order (ETO) solutions. This group of solutions is less out of the box and more our deep expertise driving time to value.

SmartAPI

The CPS SmartAPI wraps Winshuttle with an easily programmable interface to interact with Winshuttle forms, workflows and background jobs. Smart API works with Winshuttle Composer enabling users to create admin forms for Winshuttle.

SmartMONITOR

SmartMonitor automatically monitors background jobs and provides efficient reset options to this otherwise cumbersome process.

SmartADMIN

CPS SmartAdmin provides the Winshuttle Administration a Smart Form that combines otherwise disparate admin functions such as cancelling workflows, reassigning or completing tasks on behalf of others and resetting background jobs.

CPS Managed Services

Load Winshuttle faster and then don't worry about the environment. CPS experts make it easy.

BEST SELLERS

SolutionCARE

The most widely used block hour services support for Winshuttle, CPS supplements standard product maintenance with experienced staff in every time zone. We address process, solution, best practice and environment issues that may influence the Winshuttle application under tight SLAs. Our support offering is sourced by expert architects that diversely know SAP, Winshuttle, SharePoint, Qlik, Microsoft BI and many other BPM and RPA solutions.

Winshuttle "Complete" Training

Ever want to get training on the entire Winshuttle product from Mass Data to Workflow and do so around a singular process? Taught by Senior Process Architects, sharing use case best practices and examples this course is coming to a region near you. Also be sure to attend free monthly WebTips training webinars.

Process BI

The most widely used plug-n-play dashboard for Winshuttle Foundation. See reverse for details.

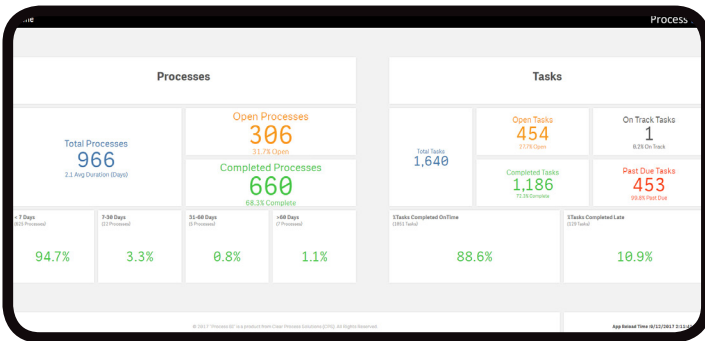

Exclusive Accelerators | Add-ons for rapid time to value / efficient application management

Process BI

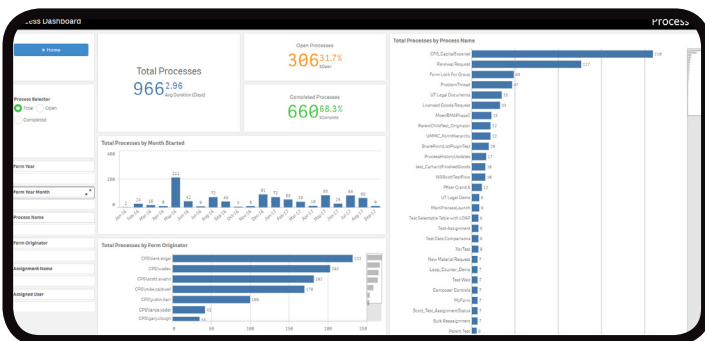

1 Packaged BI Solution

This pre-configured, turnkey, device-agnostic dashboard is the most used Winshuttle BI add-on. Install in less than an hour and instantly see real-time, drill down process and task KPIs. Eliminate reporting, wasted time and custom solutions. Scalable to solution specific metrics can be added. Out of the box you will see tasks, bottlenecks, workflow KPI's that are fully configurable and scalable to any ERP, SAP, PLM, CRM and even HANA plug-in.

"The SolutionCARE offering made the issue-to-resolution process super smooth and added value to Winshuttle Workflow Maintenance the product itself"

- Kerry Hoffman, Pfizer

"CPS has been an invaluable partner, helping us to overcome workflow solutions. If you are using Winshuttle and have complex issues to overcome I would highly recommend using CPS."

- Jim Polley, Raytheon Co.

About Clear Process Solutions

Clear Process Solutions (CPS) is the premier global services / implementation partner for Winshuttle with expertise in Winshuttle Foundation. A turnkey provider of Winshuttle packaging, licensing, training, services and support, CPS specializes in process results. Our team has deep experience in both SAP and Winshuttle toolsets. CPS implements both mass data automation and mobility enabled webform and workflow which integrates with SAP and extends across other ERP, PLM, and CRM systems.
