

Project Services

Accelerate Your Foundation Time to Value

The Challenge

Owning Winshuttle offers an organization the capability to automate just about anything and demand for project throughput often outpaces internal resources. Foundation projects particularly can range in complexity, sometimes requiring a wide breadth of real world implementation experience to satisfy all requirements. CPS helps answer many questions for our customers:

- As a project sponsor, how do I assemble the best team for a successful first project?
- What more can be done with Foundation? Rapidly?
- How do internal developers learn a methodology to define all requirements prior to building a solution? Especially when multiple departments are involved?
- What are best practices for choosing the right Composer option for each design requirement?
- How can solutions extend to more complex use cases such as integrating with other business systems (Email, SharePoint, CRM, PLM, HRIS and more).

Key Benefits

- Proven CPS project methodology: Design through support, project management through expectation management.
- Collaborative platform for combined project team.
- Technical and industry SAP process skilled resources.
- Real world implementation experience for most solution types.
- The only partner certified to support workflow solutions outside of SAP.
- The most experienced team for webservice and API integrations and extended solutions. You want your solution to have robust functionality? CPS makes it happen.

Ways to Get Started

- Attend a regional training class
- Collaborate with CPS on your next Foundation project to accelerate success
- Contact Info@clearprocesssolutions.com

“ Don't go it alone, especially with your first form and workflow project. The CPS team knows how to help.”

- Dave Drake, Cooper Tire and Rubber Company
