

Who is Clear Process Solutions?

We are experts in Digital Process Transformation, focused on workflow, data analytics, and business process optimization.

We simplify complex processes, data, and integrations. Our field of play is focused around ERP, PLM, MES & CRM environments. This allows our clients the ability to clearly see their processes, data and make intelligent business decisions.

Our team is our strength; which is driven from the depth of their process experience combined with their interest to drive quality low code automation to satisfy every client. That is the essence of our company. Behind them is a suite of carefully selected software tools that enable world-class execution and performance.

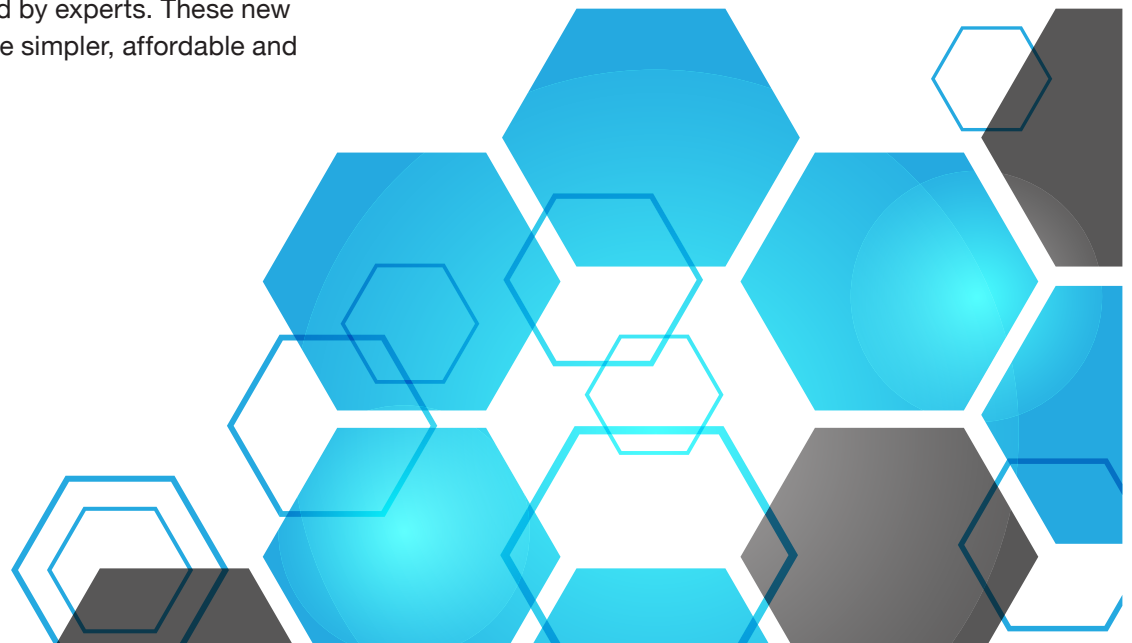

Why are we so passionate about what we do?

We believe there is a seismic shift occurring in industry. Cloud-based platforms have enabled the next generation of agility, teamwork and collaboration inspiring improved innovation opportunities.

These tools are disrupting the existing model of code-heavy implementations delivered by experts. These new application tools or platforms are simpler, affordable and driven by the business.

Digital Process Transformation Solutions

- Digital Process Applications
 - AgilePoint: Enterprise-class, future-proof, low-code application platform
 - Winshuttle: Enterprise application platform integrated with SAP for data management and data flow
- Data Analytics & Business Intelligence
 - Qlik Sense: Enterprise data analytics
 - Process BI: Winshuttle and AgilePoint Dashboards powered by Qlik Sense
- Shop Floor Process Automation
 - Tulip: Manufacturing application platform to optimize human-centric processes
 - ERPlinc for Tulip: Bridging the gap between shop floor and ERP, PLM, CRM, MES
- Cloud Product Design Platform
 - Onshape: Modern CAD/Data Management platform to enable real-time collaboration
 - ERPlinc for Onshape: Bridging the gap between cloud design and ERP, PLM, CRM, MES

Clear Process Solutions

Our Big Differentiator – Managed Services and Solutions Support

CPS historically delivered results through mostly time and material project services and our exclusive Solutions support offering known as SolutionCARE. To reduce the higher costs of ad-hoc projects and the total cost of ownership, while ensuring heightened resource access and oversight, CPS launched a comprehensive offering known as Business Process Managed Services (BPMS). This BPMS offering delivers and can be consumed through the following annually procured services:

- **SolutionCARE** addresses reactive-type service requests (tickets) and some development, training and architectural work items. It is intended to cover Service Level Agreement (SLA) based, task-oriented, short-duration services and support. Annual contracts, monthly consumed.
- **Professional Services** are a committed number of monthly hours to be used for project engagements. Committed hours can be used for applications, forms, workflows, data management and dashboard/analytics projects. Annual contracts, quarterly consumed.

LEANutopia and Our User Groups

CPS is the company behind LEANutopia networking and innovation events and for many, the enablement team that brings process solutions alive. Regardless of job title, we encourage anyone looking to advance the impact of lean data and efficiency to the top and bottom line to attend our events. From workflow, AI, IoT, Cloud solutions and other emerging technologies, LEANutopia fosters live customer stories encouraging discussions around driving improved teamwork, data value and overall collaboration.

Additionally, we are leaders and board members of the SAP Winshuttle User Group (WUG) and the hosts of Data Analytics User Group (DAUG).

Did You Know?

- Most customers choose CPS to avoid ERP, PLM, CRM Line of Business (LoB) platform configuration or customization costs that radically increase total cost of ownership such as LoB upgrades, licensing, refactoring, testing, acquisitions, and deployments.
- CPS is the 1st Business Process / Digital Process Automation company to offer SLA-based outsourced solutions support for key process platforms including: SharePoint, Winshuttle, AgilePoint, Qlik, SQL and Tulip.
- Many diverse companies benefit from SolutionCARE managed services to ensure rapid ROI and up-time for their process platforms. Sample clients include Kichler Lighting, Moen, Rockwell, HDT, Raytheon, Eli Lilly, Cooper Tire and Pfizer.
- CPS is an award-winning RPA and digital process transformation solution company. Our digital experience and results are second to none.
- CPS Digital Process solutions are directly in support of Cloud, IoT, AI, machine learning and other emerging technologies.
- Our LEANutopia events directly benefit humanitarian and charitable organizations including The Ronald McDonald House, Hands of Gratitude / Enabling the Future prosthetic hands, and ZipAid for ALS.
- CPS is the digital-enabler to companies around the world, large and small from banking, manufacturing, health sciences to distribution and consumer products. Sample clients include Carhartt, Kaufman Container, Federal Mogul, CREE and Analogic.
- Our team provides fast time to value through innovation pilots.
- CPS employs process experts and workflow architects nationwide that are deeply trained around low-code digital process applications and analytics.
