

LEAVE  
THE PAPER  
BEHIND

## What's New in Primafact 4.5 Feature Overview

We are pleased to release Primafact 4.5, which delivers many improvements requested by our users. With faster speeds and more convenient settings, Primafact 4.5 brings greater efficiency and productivity to your paperless practice. Document viewing options have been refined to improve legal document review—on the desktop and in advocacy settings.

### Performance Improvements

- Working in Primafact is faster than ever, with quicker start, navigation and search speeds.

### Detachable Document Windows

- Detachable Document Windows improve on-screen document review by allowing you to open multiple Primafact documents side-by-side.

Readily compare and analyze different documents without the distraction of switching screen views.

### Enhanced Document Viewing

- You can adjust your Zoom settings to see more than one page at a time as you scroll through a document.
- The new Continuous Scrolling view lets you scroll through documents using your mouse wheel, giving you more precise navigation and fewer viewing interruptions.
- Primafact's new Reading Mode lets you automatically scroll through your document "hands free" at whatever speed you select, making it easy to go through your documents with your hands free for other review tasks.
- The Binder Flat View now lets you sort exactly as you do within your Primafact Binder, making it easier than ever to organize your documents.
- You can now automatically save changes without prompting, eliminating unwanted interruptions during document mark-up for a more seamless user experience.

### More Efficient Importing

- Importing documents is now faster—boosting efficiency when bringing documents into Primafact.

- PDFs and certain image file types are automatically imported to Primafact when dragging and dropping, letting you take advantage of Primafact's markup features.
- Copying and Moving files aligns to Windows standard behaviour.
- Import a wider variety of PDF documents without compromising viewability, with extended PDF support to include a wider range of PDF implementations.

### Confidently Identify Search Results

- The New *Open Document Location* feature makes it easier to see a search result in the context of its binder location, helping you quickly assess relevance.

### More Control Over User Settings

- Increased display setting options give you more choices than ever, allowing you to view documents according to your preferences.

You can define your default Zoom level and default scrolling preferences (including continuous scrolling), as well as the appearance of margins, edges and gaps between pages.

- Zoom settings are now automatically standardized to various displays.
- New settings give you greater control over managing document dates in profile fields and when extracting pages from existing documents.

### Resolved User Issues

- Primafact 4.5 resolves many reported issues to improve performance and reliability.
