

Migrating to Oracle Cloud in style

A simplified migration process to help organizations successfully move from **JD Edwards to Oracle Cloud**

Introducing the Ascend Program for Migrating Oracle JD Edwards to Oracle ERP Cloud

The projected worldwide public cloud services market in 2020 is over \$260 billion. Cloud technology is no longer a trend, **the future has arrived**. Reasons organizations are moving from on-premise ERP to the cloud vary – from changes to the business, to a need to reduce cost and risk, to a strategic vision of using the latest technology for innovation.

Return on investment is another important factor, and recent research shows cloud Software as a Services (SaaS) now **delivers 3.2 times more ROI** than on-premise software.

Ascend was specifically developed for organizations running Oracle JD Edwards (JDE) ERP. The program provides a framework for businesses to:

- **Understand the key components of a cloud migration**
- **Take inventory of active JD Edwards customizations**
- **Conduct a gap analysis and build a future roadmap**
- **Accelerate the migration from JDE to ERP Cloud**

REDUCING RISK

Terillium is an Oracle Platinum Partner and Cloud Excellence Implementer, certified in both JD Edwards and ERP Cloud. Our team's extensive Oracle ERP knowledge, across products, positioned us to develop the Ascend program.

We enable our clients to reduce risk during an ERP Cloud migration project through:

- ▶ In-depth knowledge of both JD Edwards and ERP Cloud
- ▶ Data conversion automation
- ▶ Effective software footprint mapping and planning
- ▶ Proven project methodology
- ▶ Functional and technical translation of JDE to the Cloud
- ▶ Fewer "unknowns" leading to better change management

What is the Ascend Program?

Ascend enables organizations to migrate from Oracle JD Edwards to Oracle ERP Cloud, while reducing risk and time to go-live. The Ascend program combines industry best practices, specific migration tools, and the Oracle Unified Methodology to ensure a successful outcome.

JD EDWARDS EVALUATION

As part of the Ascend program our team will:

- Evaluate current JDE set-up and functionality
- Map JDE software modules to ERP Cloud software modules
- Compile a comprehensive list of JDE modifications and create a plan for moving forward
- Evaluate business processes and identify areas for improvements
- Take inventory of business reporting requirements
- Create an ERP Cloud business benefit matrix

ACCELERATING THE DATA CONVERSION PROCESS

Ascend product and process components accelerates data conversion, and the overall migration process from JDE to ERP Cloud. Our team works with you to:

- Build a comprehensive data migration strategy
- Analyze and select the data to migrate to ERP Cloud
- Automate the JDE data download, in an ERP Cloud Excel-based upload format
- Upload data to ERP Cloud

Ascend includes a data validation methodology, prebuilt data mapping for foundation and standard modules and well as core data fields, with the capability to expand to user defined data.

A PROVEN PROJECT METHODOLOGY

Our team has developed a process built around our proven ERP project experience to manage risk and ensure project success. We've incorporated Oracle's Unified Methodology with Terillium's proven approach to deliver a project that is:

- Focused
- Flexible
- Efficient
- Comprehensive
- Cost Effective

Our team is certified in JDE and ERP Cloud, making us uniquely qualified to handle the migration and data conversion process. Our methodology incorporates comprehensive training, to ensure end users are educated and ready for the transition. Along with our dedicated team, Oracle offers dedicated Success Managers to ensure a successful project.

END USER TRAINING AND ONGOING SUPPORT

Terillium has dedicated managed services for training, optimization, ongoing support and initiatives.

ABOUT TERILLIUM

- ▶ Celebrating 26 years as an ERP consulting partner
- ▶ Recipient of 16 Oracle Excellence Awards
- ▶ One of the largest JD Edwards consulting partners in the United States
- ▶ Oracle Cloud Excellence Implementer status for ERP Financial Management – General Ledger and SCM Procurement in North America
- ▶ Certified in Oracle Unified Methodology for cloud
- ▶ Extensive industry experience working with over 700 organizations across the country

“We selected Terillium for our Oracle cloud migration because they have been our partner with JDE for a number of years and we trust them. They are a top-notch team of folks who really do put the customer first.”
