# Why NetSuite is a Top Technology for Teams Working Remotely

1st
TRUE CLOUD SOFTWARE FOR BUSINESS

NetSuite was the first-ever enterprise cloud software when the company launched in 1998. Twenty-two years later the robust solution remains a market leader, used by organizations around the globe.

True cloud software means users have access from anywhere at any time.

20
OVER 20 YEARS OF DELIVERING EXCELLENCE

NetSuite was built to run the entire business, not just one department of the business (for example, only finance or HR).

NetSuite makes it easy to run different areas of your business in various locations – or to enable all or some of your workforce to work remotely.

99.98%
AVERAGE UPTIME ON NETSUITE'S PLATFORM

System downtime costs you productivity and money. NetSuite is a reliable solution you can count on from anywhere.

This is one of many reasons NetSuite has been named a best ERP software by Gartner, IDC, G2 Crowd, GetApp and more.

20k
ORGANIZATIONS CAN'T BE WRONG

More than 20,000 organizations around the world run NetSuite.

They choose NetSuite for its robust, built-in capabilities for: finance and accounting, order management, procurement, production, inventory management, warehouse management, supply chain, CRM, project management and more.

100%
USERS ON THE SAME RELEASE

NetSuite's biannual updates are automatically pushed out to users. This means that all NetSuite users are on the same release, enjoying the latest features.

This also ensures the same user experience for everyone on your team accessing NetSuite, no matter their location.
