

5 Ways Businesses Benefit from AP Transformation

Inefficient AP processes put businesses at a disadvantage. Here are 5 ways that AP transformation improves business outcomes.

1

IMPROVED PRODUCTIVITY

Graphical dashboards provide accounts payable managers with real-time visibility into the status of key performance indicators such as invoice volume and approval cycle times.

2

BETTER CORPORATE AGILITY

Pre-configured reports can be used to analyze trends, identify potential issues, and make proactive decisions.

3

ENHANCED WORKING CAPITAL PERFORMANCE

Better manage and more accurately project cash flow with accrual reporting and other working capital insights.

4

LESS RISK

Automation eliminates the possibility of lost or misfiled invoices. Images and data are automatically retained in a secure repository based on business requirements and/or regulations.

5

GREATER SCALABILITY

Enhanced visibility into AP operations maximizes the use of staff. Supervisors can view and manage electronic queues for accessing, prioritizing and distributing work.
