

THE MARVIN **CONTEMPORARY** STUDIO

A large window with a dark wooden frame is the central focus, looking out onto a vast landscape. The view outside shows a range of mountains in the distance, partially obscured by a thick layer of white clouds. In the foreground, the dark green tops of evergreen trees are visible. The sky is a pale, hazy blue. The window frame consists of several dark wooden mullions that create a grid-like structure, with the largest pane in the center-right.

AN INVITATION TO INSPIRATION.

Large expanses of glass that connect interior spaces to the surrounding landscape. Narrow frames with clean lines. Understated minimal hardware. And of course, an abundance of natural light. If you can dream it, the Marvin® Contemporary Studio can build it.

OVERLOOK RENOVATION // WASHINGTON, D.C.

"In almost all of my projects we have large expanses of window walls. What I've found is we can work very easily with Marvin products and come up with, in cases like this, a window wall configuration that looks custom and very, very special, but actually involves primarily standard casement windows and direct set windows. The Marvin team is an invaluable asset to have at your disposal when designing a clean, modern structure."

- ROBERT GURNEY, Robert Gurney Architect // Washington, DC

MARVIN

ARCHITECTURAL SERVICES

"Our number one job is to turn an architect's vision into reality. Whether it's a wall of glass or uniquely sized custom windows, we work closely with architects to meet the structural and minimalist aesthetic requirements that modern architects demand."

- ED MARTIN, Marvin Architectural Services

CAPABILITIES

- Project conception and consultation
- Detailed analysis of construction documents and specifications
- Engineer complicated assemblies for large expanses of glass
- Custom and direct set windows
- Product and testing
- Unmatched customer support

WEDGE HOUSE - OTTAWA, ON // VANDENBERG & WILDEBOER ARCHITECTS INC. // CLOUTHIER CUSTOM CARPENTRY

"Marvin could readily provide the sizes, shapes and technical benefits of a thermally advanced window to meet the environmental demands of this northern project. The fit and finish of the aluminum clad Douglas Fir windows melded beautifully and seamlessly with the interior and exterior detailing of the home."

- MALCOLM WILDEBOER,

Vandenberg & Wildeboer Architects Inc. // Ottawa, ON

MINIMALISM FOR THOSE WHO WANT IT ALL.

WEDGE HOUSE // MARVIN PRODUCTS FEATURED:

Sliding Patio Door (XO), Outswing & Inswing French Door (OXO), Ultimate Awning, Rectangle Direct Glaze, Polygon Direct Glaze, Ultimate Casement

Bronze Clad Exterior / Douglas Fir with Clear Coat Finish / Oil Rubbed Bronze Hardware

Winner of the 2016 Marvin Architects Challenge

ZILKER NEIGHBORHOOD - AUSTIN, TX // KRISTOPHER WHITE // DICK CLARK + ASSOCIATES
RYAN VINSON AND STEVEN RADKE // VINSON RADKE HOMES

Located in the vibrant Zilker neighborhood, in the heart of Austin, TX, this light-filled modern home was built in partnership between White, of Dick Clark + Associates, and boutique developer, Vinson Radke Homes. The home combines unmistakable mid-century influences with a neutral color palate and generous amounts of natural light that suffuse its living spaces with warmth. *"We use light and glass almost like its own material," says architect Kristopher White. The beauty of using the Marvin Contemporary Studio collection is that the windows immediately bring in warmth.*

"The windows complement the architecture."

- KRISTOPHER WHITE, Dick Clark + Associates // Austin, Texas

THE CLEANEST LINES.
THE BOLDEST STATEMENTS.

ZILKER NEIGHBORHOOD // MARVIN PRODUCTS FEATURED:

Direct Glaze Picture Window, Ultimate Inswing French Door, Ultimate Multi-Slide Door

Ebony Clad Exterior / Painted Pine Interior / Satin Taupe Hardware

"Our guesthouse decor is fairly transitional, so it plays well with the main home's more modern elements. But in terms of interiors, neither space offers much in the way of coastal, California vibes. We wondered if bi-fold doors would stick out like a sore thumb, or if they'd seamlessly integrate just a touch of the West. The good news is we didn't have to choose. Because Marvin offers 6 high-quality wood options, 19 clad color choices and a variety of hardware styles and finishes (including a curated collection of design options in its Gallery Collection Hardware line), it's easy to select a combination that works perfectly in your own home. Whether your space leans more traditional or modern, there's truly something for everyone."

- ERIN LOECHNER, Lifestyle blogger and homeowner

DESIGNED TO INSPIRE.

DESIGN FOR MANKIND // MARVIN PRODUCTS FEATURED:

Ultimate Bi-Fold Door, Ultimate Awning

Stone White Clad Exterior / White Interior Finish / White Hardware

Tucked neatly into the topography of its wooded site in the Green Mountains of Vermont, Tree House pairs open, inviting living spaces with large expanses of glass, which gradually opens the interior to the outdoors to establish a strong connection to the surrounding landscape. To create the expanding perspective, and to minimize heat loss, it was necessary to use large expanses of triple-pane glass with a mix of operable windows – awnings and casement. The mix of window styles allows for a variety of ways to ventilate the space.

"From the moment we've received our drawings up to quarter scale, when you can really start to compose windows, we feed our Marvin reps information to get their feedback regarding the size of the window, mulling or muntin configuration. They're good about working through whatever structural or configuration parameters there might be, all the way through to product delivery. That's a big part of why we like to work with Marvin."

- ERNIE RUSKEY, Principal, Tektonika Studio Architects // Morrisville, VT

INVITE THE OUTDOORS IN.

TREE HOUSE // MARVIN PRODUCTS FEATURED:

Ultimate Inswing French Door, Ultimate French Casement, Ultimate Casement, Ultimate Awning

Pebble Gray Clad Exterior / Painted Pine Interior / Satin Nickel Hardware

ZEN BARN - OTTAWA, ON // CHRISTOPHER SIMMONDS ARCHITECT, INC.

"Marvin windows allowed us to create the strong indoor-outdoor connection our clients desired. The ability to work with large window sizes allowed us to reduce the amount of mullions, which take away from the view and the sense of connectedness. The window's thin frames complement the modern aesthetic of the design and their thermal performance greatly contributed to this project's LEED® Platinum for homes certification."

- CHRISTOPHER SIMMONDS,

Christopher Simmonds Architect Inc. // Ottawa, ON

**ABUNDANT NATURAL LIGHT,
AVAILABLE IN ABUNDANCE.**

ZEN BARN // MARVIN PRODUCTS FEATURED:

Sliding Patio Door, Ultimate Swinging French Door, Ultimate Casement, Ultimate Awning

Ebony Clad Exterior / Painted Pine Interior / Satin Nickel Hardware

With its comfortable open floor plan, sweeping lake views and tangible connection to its idyllic waterfront site, Lake Edge is the epitome of modern lakeside living. Huge expanses of glass flood the main living space with natural light and open it to stunning views of the water. A combination of direct set and large operable windows maximize views and create an optimal balance of light and ventilation. Whimsical placement of Direct Glaze Windows along the fireplace wall offer playful, unexpected peeks of treetops, deepening the connection to the wooded site.

"With Marvin you really get everything," Rehkamp Larson said. "Lots of daylight, energy-efficient glass, plus great service and attention to detail. Marvin responds to our unique questions with a level of specificity that meets our design needs."

- JEAN REHKAMP LARSON,

Principal, Rehkamp Larson Architects // Minneapolis, MN

AN EXTREMELY OPEN INVITATION TO STAY AWHILE.

LAKE EDGE // MARVIN PRODUCTS FEATURED:

Ultimate Sliding French Door (OX, OXXO), Ultimate Inswing French Door, Ultimate Awning,
Ultimate Casement, Ultimate Casement Picture Window, Rectangle Direct Glaze

Ebony Clad Exterior / Designer Black Interior Finish / Satin Nickel Hardware

MICRO HOUSE – GREEN MOUNTAINS OF VERMONT // EH ARCHITECTS, INC. // NORTHERN TIMBERS CONSTRUCTION

Due to the small footprint of this 430 square-foot home, window size and placement played a very important role in opening up the plan and giving each space its own distinct identity. A variety of window shapes, sizes, and types were utilized throughout to respond to both function and views. This very deliberate approach to view framing lends each room its own unique vantage point and connection to the outdoors, while giving the floor plan definition and a sense of place, without being static or confining.

"I don't know if I speak for other architects, but one of the things that impresses me about Marvin is their broad range of capabilities. They can do really contemporary, clean-lined stuff, or really traditional stuff. They have a flexible aesthetic. They make a lot of things happen. They can gang big windows together. They can build staggeringly huge windows. They have the flexibility that a lot of other companies don't have to realize these special designs. Basically, if I can come up with it, they'll make it happen."

- ELIZABETH HERRMANN, EH Architecture + Design // Bristol, VT

HOME, SWEET, TINY HOME.

MICRO HOUSE // MARVIN PRODUCTS FEATURED:

Ultimate Awning, Ultimate Casement, Ultimate Casement Picture Window

Custom Color Clad Exterior / Painted Pine Interior / Satin Nickel Hardware

"In between each set of windows is a $\frac{3}{8}$ " piece of plate steel. If we had done it with wood, it probably would have been at least two 2x4s. We saved about 3" of width by using steel. That was a really important factor, to have clean, thin lines to not obstruct the waterfront view. It was not difficult, Marvin made it easy."

- GREG TORCHIO, Torchio Architects, Inc. // Centreville, MD

REAL WOOD TO FRAME UNREAL VIEWS.
