

How much time are **YOU** spending entering **Direct Bill Commissions?**

Want to cut that time by 80-90%?

Import transactions into **TAM®**, **Vision®** or **Epic®** using the **Commission Import Tool by Alexant!**

TAM®, Vision® and Epic® provide the ability to import transactions from an Excel spreadsheet. There are only three **REQUIRED** fields - Policy Number, Effective Date OR Expiration Date and the Commission Amount in order to create the transaction. However, commission statements don't usually include the Policy Effective or Expiration Date, especially one that might match up with the Effective or Expiration Date on the policy detail screen.

The **Commission Import Tool** by Alexant **SOLVES** the problem!

*"I am so excited! I imported 570 transactions in just a few **minutes**. Your program is so exciting!" - Marty Hunt, Eustis Insurance*

*"The tool **SIMPLIFIES** getting direct bill commissions posted in **TAM®**. What used to take **HOURS** is down to **MINUTES**. A wonderful benefit of the tool has been the clean-up of our Billing Screens. Retention Reporting is now possible!" - Pam Carson, Jones Insurance Agency*
