Tekkers

IT SOLUTIONS

This brochure covers:

Consultancy

“We have a great working partnership, trust their advice and would recommend them to anybody.”

“Tekkers have supported us since 2015 and have always responded quickly to any issues. They've resolved several issues with our backup system where others had failed to do so and continually assist us with a wide range of issues. We have a great working partnership, trust their advice and would recommend them to anybody.”

Alistair Austin,
The Alarming Company

Wouldn't it be nice to get a Specialist's advice for your IT products and projects?

Tekkers can provide a range of consultancy services to aid in your business IT projects, installations or in-depth technical troubleshooting.

From design and planning of large scale projects such as infrastructure refreshes or disaster recovery through to assisting existing IT departments with troubleshooting and resolving complicated technical issues. Our advice is always impartial and unbiased.

Call us anytime to talk about your IT **01329 888 625**

Tekkers
IT SOLUTIONS

3

Here's how we can help you:

Hardware Installation

Installation on a vast range of hardware including, but not limited to HP ProLiant Servers, Networking infrastructure including HP and Cisco switches / wireless, HP SANs, Desktop PC's and Laptops.

Projects

Includes Project Management with our PRINCE2 certified project managers as well as design and planning for a wide range of implementations.

Software

We specialise in Microsoft products, as well as Citrix XenApp / XenDesktop and VMware vSphere. Consultancy can be provided to assist with installation and deployment, or for troubleshooting issues.

Tender Documentation

Do you need to produce a tender document to send out to potential suppliers? Our consultancy services can be used to draw up complex technical documentation to enable you to get the best service, at the best price from your suppliers.

Management Buyouts

Proven experience of dealing with MBO's for those who need to look at the high level overall IT strategy, right down to the final detail to ensure everything is taken care of.

Cloud Migration

Advice and expertise on the latest cloud solutions. For some businesses, moving 100% of your IT can spell disaster. We can advise around potential pitfalls and ensure a move to the cloud is successful.

Disaster Recovery Planning

Ensure that your business can continue operating in difficult times, and doesn't suffer an extended outage. Confirm your RPO's (Recovery Point Objectives) and RTO's (Recovery Time Objectives) to make sure your business continuity plans fall in line with the business requirements.

Office Relocations

Moving offices can quickly become very complicated. Tekkers can assist to ensure IT services are operational as soon as possible and alleviate risks. Make sure critical services such as telephones and broadband are ready and waiting when the move happens.

Elliot Bath

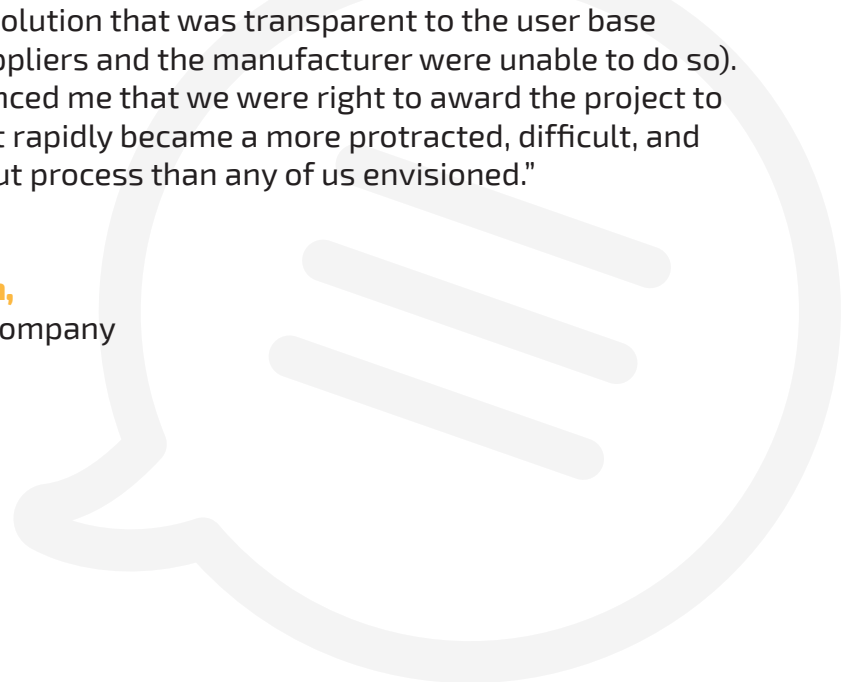

Support Engineer

“We were right to award the project to Tekkers...”

“I’d like to thank you both for your efforts and patience untangling the root cause of the problem and coming up with an innovative and workable solution that was transparent to the user base (even when suppliers and the manufacturer were unable to do so). That has convinced me that we were right to award the project to Tekkers in what rapidly became a more protracted, difficult, and complex roll-out process than any of us envisioned.”

Alistair Austin,
The Alarming Company
