

# Tehama MSP and MSSP Partner Program

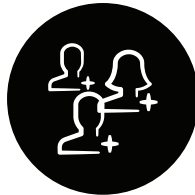

Tehama is the leading SaaS platform for secure IT service delivery. Tehama provides secure and virtual desktops on the cloud to enable fast and compliant onboarding, scaling, managing and auditing of global workforces. With Tehama, service providers, and enterprises can quickly connect with increased security through virtual and secured perimeters that extend zero-trust network access.

Tehama has achieved SOC 2 Type II certification with 107 SOC 2 controls built into the platform and can accelerate SOC 2 Type II compliance for your business. With Tehama, MSPs, MSSPs, and enterprises of all sizes have increased protection against malware, cyber-attacks, and other threats to data security.

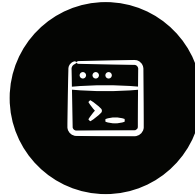

## Get to work quickly with only one hour to productivity with Tehama

**1****Create a Tehama Room**

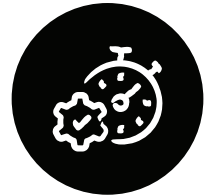

The Tehama Room is created in the cloud in less than 15 minutes.

**2****Invite users**

Easily add employees or third-party vendors and have them enroll within minutes.

**3****Add users to a desktop**

Fully-provisioned, virtual desktops that can be shared between workers.

**4****Start work**

Get to work with complete confidence that every move is being audited.

Tehama Reseller and Referral Partners are uniquely positioned to offer buyers of IT services a solution that provides peace of mind when third-parties are accessing their most valuable data assets.

### Grow

As word of mouth travels, and the demand for Tehama increases, you will be rewarded as these accounts expand their use of the product.

Tehama provides secure and virtual desktops on the cloud to enable fast and compliant onboarding, scaling, managing, and auditing of a global workforce. Tehama is a cloud-based SaaS solution that provides all the IT infrastructure needed for enterprises to connect, leverage, and grow global teams, including third-parties, securely. Tehama's SOC 2 controls give you the peace of mind to deliver, secure, compliant and audited IT services for any industry. It also eliminates the potential of privileged credential theft and lateral network movement associated with VPN access.
