AIRS program

Deer Valley Resort implemented the AIRS program to handle all donation requests a little over a year ago. We were looking for a program that could streamline our current system and save us some time.

Our old system utilized an Excel spreadsheet for tracking and researching donation history. We requested a written letter or an email from groups seeking donations. When the requests were received, a history of past donations made to the same group were manually listed on each letter and then reviewed by our donation committee. This is all handled digitally now and easier for the committee to review each request and saves preparation time and a lot of paper.

Once the donation committee made their decision for each request, we would print out a letter informing the group of the committee's decision; declined or approved. With the AIRS system, we do not need to generate these letters and manually mail them out, this process is handled digitally via email. Again, saving preparation time, paper and postage.

The initial set up and editing process of the AIRS program is very user friendly and the company provides a great support team.

This program has saved Deer Valley Resort time and money and we would recommend this program to others.
