

ATTENDANCE MONITORING

Through TritonWear

Monitoring practice attendance:

- ★ Improves athlete accountability
- ★ Encourages better attendance

How to Monitor Attendance w/TritonWear

For convenient access to a complete attendance record - without having to consult coach every time!

TRITONWEAR INSIGHTS

ON ATHLETE DASHBOARD

On the Workout Results section on the athlete's dashboard, see a list of most recently recorded workouts, including dates and total distances completed.

Click on a day or session to view details of that practice.

ON WORKOUT RESULTS PAGE

On athlete's Workout Results page, see a list of all their recorded workouts, including the sets they completed for each session.

Incomplete sets will inform you if they left early or arrived late to that practice.

ON LOAD MONITORING PAGE

On the load monitoring page, view attendance, along w/ athlete's load numbers, on a weekly capacity.

For a given week, days that contain either a load number or N/C are the days in which an athlete has a recorded workout.

MANUALLY ADDED WORKOUTS

Attendance for all practices not tracked w/ TritonWear (including training done outside the pool) can still be recorded on Insights.

On the Workout Results page, athletes can click on Add New and input the information for the workouts they completed, providing a complete history of training.
