

Protect Your On-line Services and Prevent Frauds Without Impacting Your Business and Your End-users

Key Differentiators

Cleafy protects against Man-in-the-Browser (MITB), Man-in-the-Middle (MITM), Remote Access Tools (RAT) and Mobile Overlay and other sophisticated techniques used by today advanced attacks

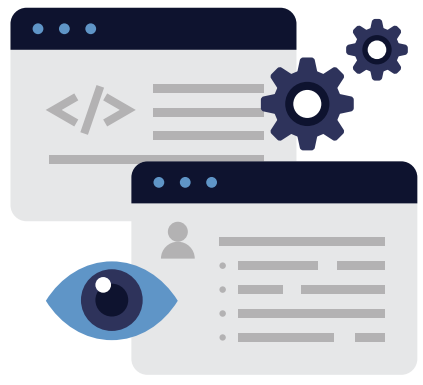

Advanced threat detection and protection

- ✓ Patented Full Content Integrity (FCI) continuously verifies full application integrity (DOM/XHR/API)
- ✓ Deep threat visibility automatic extraction of threat evidence (e.g. malicious web-injects and mobile apps)
- ✓ Patented Dynamic Application Encryption (DAE) to enable safe transactions from infected endpoints

Client-less and application-transparent

- ✓ Client-less - no agent deployed and passive mobile SDK – no touch of application backend infrastructure
- ✓ User-transparent – no impact on end-user experience, content delivery and endpoint performance
- ✓ Application-independent - no changes required to application code – no re-training upon new releases

Open, scalable and cloud-ready

- ✓ Open architecture and comprehensive REST APIs –integrates any Transaction Monitor, Case Mgmt, SIEM
- ✓ Scalable to continuously monitor full application perimeter and analyze millions of events / day
- ✓ Deployed either on-premise or over the Cloud

Main Industries

Cleafy helps any company exposing business-critical on-line services to un-managed endpoints by delivering end-to-end application visibility, continuous threat detection and dynamic protection against Account Takeover, Transaction Tampering and Payment Frauds

Banks & Financial Services

E-commerce

Enterprise Services

Customer Benefits

Prevent on-line frauds from infected endpoints

Reduce false positives by up to 90%

Shorten case analysis from days to hours

Stay compliant with security regulations

Cleafy and Citrix

Cleafy can be smoothly integrated into any NetScaler architecture, by leveraging its unique traffic transformation and routing features, and perfectly complements NetScaler security portfolio
