

Family Centered. Physician Connected.

OUR PROMISE

Providing a life filled with meaning and engagement for those with memory loss is our passion. We are deeply committed to enhancing the well-being of those touched by Alzheimer's disease and other dementias – our residents *and* their families. Our community offers leading-edge, comprehensive memory care in a safe, thoughtfully designed environment.

The Ganzhorn Suites enriches lives by providing evidencebased clinical care, a team of specially trained certified caregivers, sophisticated safety and monitoring technologies and personalized enrichment programs. Our residents are our inspiration . . . we promise to do everything we can to ensure their safety, comfort and well-being.

WELCOME TO THE GANZHORN SUITES

The Ganzhorn Suites is an advanced memory care assisted living community dedicated to meeting the evolving needs of residents with Alzheimer's disease and other forms of dementia. We understand that each resident experiences a unique journey, so our care and programming are specifically tailored to fit each resident's individual needs, strengths and abilities.

Caring for individuals with Alzheimer's disease and other memory challenges is our full and complete commitment. It's all we do. We are here as a resource for residents and their families throughout all the stages of the disease process. We believe in enhancing our residents' independence and well-being by offering:

- Evidence-based memory care
- Nationally recognized consulting neurologist
- A team of Certified Dementia Practitioners®
- Exceptional staffing levels nearly twice the levels found at typical memory care centers
- Advanced safety and monitoring technologies
- A thoughtfully designed, purpose-built environment

The Ganzhorn Difference

At The Ganzhorn Suites, we focus on innovation in care, technology and residential design. We are among the very few specialized memory care assisted living centers with the ability to provide complex medical care to residents in the later stages of Alzheimer's disease.

This focus, along with our heartfelt determination to make a difference in the lives of those we serve, is what makes our community different from any other memory care community you'll find.

Evidence-Based Approach

We believe resident-centered memory care services ensure the best possible environment for our residents. Our clinical outcomes, benchmarked to national data, demonstrate our exceptional care. Led by a nationally renowned neurologist, our memory care programming is based on the latest Alzheimer's research findings and evidence-based care practices.

Advanced Technologies

Our state-of-the-art technologies provide the safest, most secure living environment possible for our residents. We offer:

- Sophisticated safety and monitoring devices that immediately alert caregivers of residents' needs and activities, allowing maximum freedom in a protected environment
- Customized web-based memory tools and programs to keep families and residents connected
- Electronic medical records to facilitate communication with physicians and other health care providers

Purpose-Built Design

Our center reflects innovation in environmental design, considering the impact of light, sounds, color and textures on residents with memory loss and incorporating only safe, soothing design elements. Serene spaces, private suites, natural light, circular paths and simple décor with memory cues combine to create a comforting, easy-to-navigate environment.

The Ganzhorn Suites offers four small households, each with a kitchen, living room and den. These households are built around beautifully designed tranquility gardens that provide opportunities for residents to enjoy the outdoors.

Specially Trained Team & High Staff-to-Resident Ratios

Every member of our care team is a Certified Dementia Practitioner® (CDP) who passionately dedicates each day to providing life-enriching care to our residents. This is an earned credential that recognizes the highest standard in Alzheimer's and dementia care practices.

Families take comfort in knowing we have one of the highest staff-to-resident ratios found in a memory care assisted living center. For residents, this means more attentive, personalized services. And, because our team members consistently provide care to the same small group of residents, strong bonds form between caregivers, residents and families.

PURPOSEFUL LIVING

At The Ganzhorn Suites, we believe purposeful living is achieved by engaging *with* our residents, rather than just doing things *for* our residents. We take moments during care to use conversation techniques and touch to spark memories. This approach helps to create positive reactions that keep residents engaged and connected.

Purposeful living and enrichment opportunities are in every interaction we share with our residents – something especially important when caring for those with memory loss.

At The Ganzhorn Suites, everyday moments are seen as opportunities to create meaningful experiences that provide our residents with a sense of identity. Even the simplest activity can be beneficial and worthwhile.
