YOU'RE A WOMAN WHO KNOWS WHAT SHE WANTS.

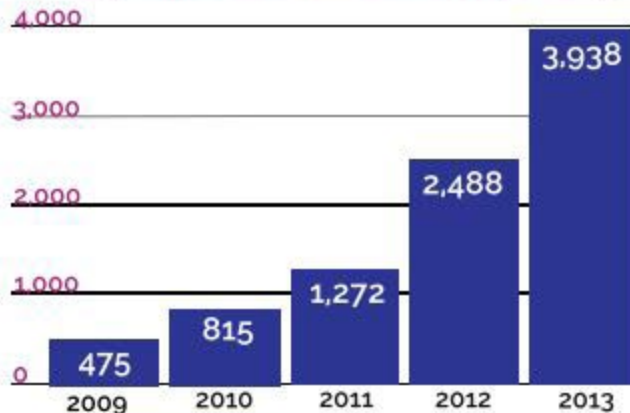

MAYBE...

- You're in the middle of building your career
- You haven't met the right partner
- You have a health condition that might affect your future fertility
- You just aren't ready to be a parent.

EGG FREEZING IS QUICKLY GROWING IN POPULARITY

The number of women who have frozen their eggs in the U.S. has grown more than 800% between 2009 and 2013*

*Source: Society for Assisted Reproductive Technology

FREEZING YOUR EGGS GIVES YOU THE ABILITY TO PRESS PAUSE ON YOUR TIMELINE.

THE NUMBER ONE FACTOR CONTRIBUTING TO YOUR FERTILITY HEALTH IS AGE.

You are born with all of the eggs you'll ever have--about a million. As time passes, your fertility diminishes in both quantity and quality.

Using the eggs you froze when you were younger will significantly increase your chance of a successful pregnancy when you're ready.

GETTING STARTED IS EASY!

It starts with a one-hour consultation, where you and your doctor will assess your fertility health...

HOW IT WORKS:

Two weeks of hormone therapy to stimulate your ovaries to produce multiple eggs

Regular egg monitoring to ensure your eggs are healthy

A minor outpatient procedure to retrieve your eggs

Preparation and vitrification (freezing with liquid nitrogen) of eggs

Storage — frozen eggs can remain viable for over 10 years

STOP YOUR CLOCK WITHOUT STOPPING TIME
