

March 25, 2020

Dear Valued Customer,

As the global effect of the COVID-19 virus continues to evolve, Advanced Polymer Coatings is firmly committed to the health and safety of our employees, customers, and community.

We are closely monitoring the changing situation and I want to provide the latest news from our perspective on this situation and confirm that APC is continuing its daily production and shipping operations.

Although Ohio Governor Mike DeWine has issued a statewide order for “non-essential businesses” to temporarily close starting March 24, 2020, we believe APC is an “essential” company providing valuable linings and coatings that carry important chemicals used in the healthcare and related industries for hand sanitizers, pharmaceuticals, and many other products.

This means that APC’s manufacturing and shipping offices in Avon, Ohio, USA will remain open at this time and you can continue to order products.

Most of APC sales and administrative staff are working remotely, and can answer any questions you may have, discuss future opportunities, and send documents as needed.

Thank you for your understanding during this difficult and unprecedented time, and we look forward to continuing serving you.

Sincerely,

David Keehan  
President  
Advanced Polymer Coatings
