

Anticipate your candidates' questions before they even ask them with AI-driven text.

By leveraging text and automation, you can see candidates' conversations and interactions in real-time. AI can anticipate the next best question to delight and inform your candidates, and, ultimately, you can hire the right people in less time. **Learn more at talemetry.com.**

WORK FASTER WITH SMART AUTOMATION

Magic Contact | Start building candidate portraits before you ever talk to them by automatically pulling information from social profiles.

Quick Send | Send a simple batch text message personalized to individual recipients on-the-go.

Campaigns | Create campaigns of scheduled and sequenced messages that can be sent to one or many candidates.

Sourcing | Discover new candidates and intelligently automate the screening process.

On average, Talemetry customers complete screens in:

4.4
minutes

disqualify in
52
seconds

and save
922
hours per year

HIRE BETTER WITH LESS EFFORT

Chatbot Screening | Filter out unqualified candidates easily, move qualified candidates to the next level quickly, and bring a human into the process when it matters most.

Question Library | Access a library of quality questions and responses to be used during interviews.

Candidate Sharing | Selectively share candidate portrait information with others in the organization to better equip them for the next conversation.

Coaching Mode | Coach your recruiting managers to help them improve upon the quality of their interactions during the hiring process.

IMPRESS AT EVERY TOUCHPOINT

Chrome Extension | Use the Chrome extension to pull candidate name, phone number, and other relevant contact information directly from your ATS or favorite recruiting site to immediately start engaging with candidates. All with a push of a button. The Chrome extension makes sure recruiters meet talent where they are while simplifying their workflows and capturing data seamlessly.
