

# Remote Deposit Capture Overview

Helping org's & churches  
automate with integrated  
donor check & remittance  
scanning

# RDC Overview

Software that recognizes donor data, scans & deposits donor contributions, and updates your CRM!

We have designed this thin client, web-based software to target the inefficient and cumbersome processes that go into collecting, sorting, and key entering paper check contributions and remittance donor data.

If you want to eliminate manual errors and save valuable time, give Paperless Transactions an opportunity to demonstrate how our software can revolutionize your donor services department. We've seen large organizations streamline down from 75 Donor Services employees/temps to 4 scanners/employees...we can help you, too!

If you're interested in scheduling a live demo of our software, please go to this link and schedule a call time that works for you & your team: <http://bit.ly/2rTRFkR>
