

The Power to:

Stay **connected** on-the go.

Why Go Mobile?

Healthcare organizations that implement Mobile Solutions decrease costs and increase productivity. Mobile Solutions help catch data from on-the-fly requests, eliminate paperwork, and improve data accuracy. Going mobile does not need to be expensive or complicated. Organizations can leverage their existing devices to save budget dollars and can even combine device types in the field.

Using our native iOS application, Sentact**Mobile**, users can access our full range of solutions within our Healthcare Operations Suite. Whether your organization is using our SentactRounding for Safety & Compliance or Patient Experience Solutions, users can access our robust library of over 3,000 questions to build rounds, audits, and inspections on-the-go, or complete the same without losing any data. Our intelligent workflow can catch on-the-fly issues and deficiencies and can provide real-time visibility.

Benefits of SentactMobile

Increase Productivity. Keep your team in the field where they are most productive. With Mobile Sentact, your data can be accessed from anywhere within your hospital environment that has internet access.

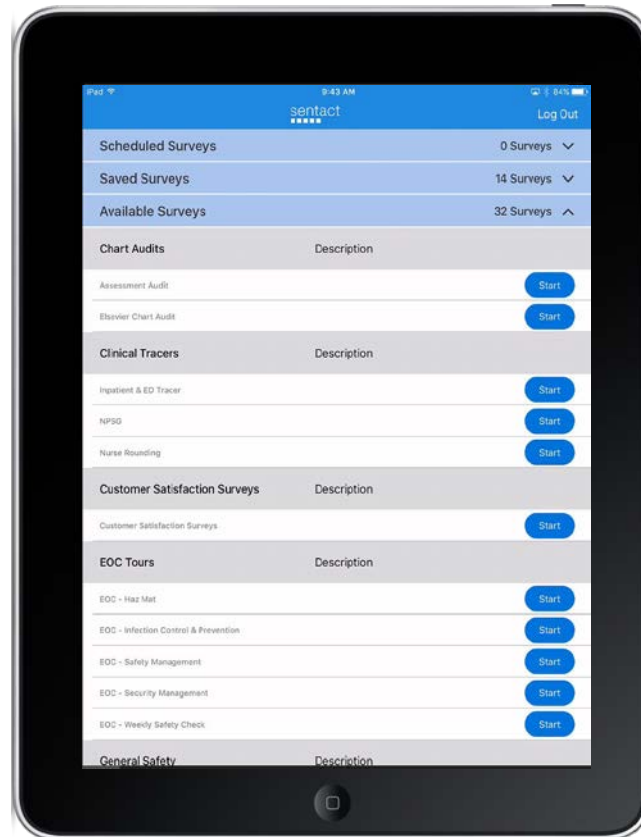

Improve Data Accuracy. By gathering data in the field, you gain access to your data immediately as well as increase the accuracy. No longer do you have to wait to enter in data from paper and worksheets.

Operational Excellence. Improve your end use customer satisfaction with quicker and more accurate responses.

SentactMobile – Easy-to-Use

Our Sentact**Mobile** application has the same look and feel as our web application making use and adoption an easy task. Simply click on the app to access your rounds.

*SentactMobile is available for our S5 application only.
