

The Home Performance Energy Assessment

A participating contractor will examine all the areas of your home that can cause discomfort and energy efficiency problems, as well as high electricity use, such as:

- Insulation levels
- How “tight” or “leaky” your home is to outside air
- Moisture problems
- The condition of your appliances
- The efficiency of your heating and cooling system
- Lighting

Your contractor may also perform several advanced diagnostic tests to help identify and prioritize energy efficiency opportunities in your home.

Energy-Saving Products Installed During Your Home Energy Assessment

(valued at up to \$200)

- ✓ Energy-efficient light bulbs, with options for dimmable, candelabra, globe and reflector bulbs
- ✓ Faucet aerators
- ✓ Efficient-flow fixed showerheads
- ✓ SmartStart™ shower valve
- ✓ Water heater pipe insulation (installed on hot water pipe for first four feet from water heater, as accessible)

Why Participate in the Assisted Home Performance with ENERGY STAR® Program?

- Energy efficiency upgrades can save you 20% or more on utility costs.
- Comprehensive work is performed by specially trained contractors.
- Enjoy fewer drafts and more comfortable rooms.
- Reduce your home’s greenhouse gas emissions.

Get Started Today!

For more information, visit EnergizeDelaware.org/AHPES or call **(877) 524-1339**.

Don’t qualify? You can still take advantage of our regular Home Performance with ENERGY STAR program.

A Whole-House Approach to Saving Energy and Money

Does your home feel drafty? Do you experience hot or cold spots that make certain rooms uncomfortable to be in? Would you like to lower your monthly energy costs?

If you answered “Yes” to any of these questions, you might be eligible to take advantage of a new energy efficiency program sponsored by the Delaware Sustainable Energy Utility.

Assisted Home Performance with ENERGY STAR® is available to income-qualified Delaware property owners (and renters via their landlords) and consists of a comprehensive home energy assessment and energy efficiency upgrades offered at a significantly reduced cost.

We take a whole-house approach to improving your home’s comfort, energy efficiency, durability and safety.

Benefits of Participating

- Get a comprehensive home energy assessment—plus a variety of energy-saving products installed—for **just \$50*** (up to a \$600 value including direct installs at assessment).
- Take advantage of **rebates that can cover a significant percentage** of the energy saving upgrades.
- Secure a low-interest loan to cover any costs not covered by the rebates, if you qualify.
- Enjoy improved comfort, increased energy efficiency and lower monthly energy costs after your home energy assessment and completion of the recommended home upgrades.

*Subject to change. Please visit website for latest offer details.

Five Steps to Savings

1. **See** if your household meets the income eligibility requirements shown in the table below. You may be eligible to participate in the Assisted Home Performance with ENERGY STAR® program if your household income is at or below the maximum annual household income listed below.

Individuals per Household	Maximum Annual Household Income
1	\$35,640.00
2	\$48,060.00
3	\$60,480.00
4	\$72,900.00
5	\$85,320.00
6	\$97,740.00
7	\$110,190.00
8	\$122,670.00

For households with more than eight individuals, and for the most current income qualification levels, please visit EnergizeDelaware.org/AHPES or call for more information.

2. **Contact** us at **(877) 524-1339** for details about how to submit your application. Note that you will be required to submit your most recent federal tax return with your application.

Download and fill out the application at EnergizeDelaware.org/AHPES.

3. **Receive** a letter or email from Energize Delaware with notification of your approval or denial to participate in the program.
 - If you are approved, you’ll receive instructions on selecting a contractor to perform your home energy assessment and/or proceeding with your recommended project(s) with eligible rebates.
 - If you do not qualify, you are still eligible to participate in the Home Performance with ENERGY STAR program.
4. **Schedule** a home energy assessment for just \$50* (up to \$600 value including direct installs at assessment). During the assessment, you’ll receive a variety of energy-saving products installed in your home at no additional cost. See our website for a list of participating contractors.
5. **Complete** your home energy efficiency upgrades. Your participating contractor will install the upgrades you choose and process your rebates on your behalf.

Rebates and Loans for Upgrades

Rebates can cover a significant percentage of the cost of your upgrades. Low-interest loans can help you finance the remaining costs after rebates.

Low-interest loans, up to \$30,000, at 5.99% APR for terms of up to 10 years, are available to qualifying homeowners through InClimate Solutions for energy-saving home improvements. Apply online at www.EnergizeDelaware.org/Apply or call **(877) 453-2327**.
