

# Unvented Combustion Appliance Removal Recommendation

***EVERY unvented combustion appliance is a high risk Carbon Monoxide generator!***  
***Simply speaking, you are turning your house into a chimney.***

“Carbon monoxide poisoning in pregnant women can cause birth defects.”

Environmental Protection Agency

“Carbon monoxide is an odorless, colorless and toxic gas. Because it is impossible to see, taste or smell the toxic fumes, CO can kill you before you are aware it is in your home.”

Environmental Protection Agency

“Even when operating properly, these units produce unhealthy exhaust gases such as nitrogen oxides and excess water vapor.”

Department of Energy

“Consumers who want to reduce risk of adverse health effects due to exposure to combustion products should not use unvented appliances.”

American Society of Heating, Refrigerating, and Air-Conditioning Engineers
