# INTRODUCTION

Are you feeling the itch to refresh your inbound marketing campaigns, but unsure where to begin? Inbound is all about publishing helpful and interesting content your audience wants to consume, but with the infinite number of approaches and ever-increasing creative standards, the possibilities of how your campaigns might take shape can be overwhelming.

To help get the inspiration flowing, we've collected 32 examples of truly enviable inbound marketing. Whether you want to rethink your approach to social media, email, or blogging, we've curated top-notch examples to expand your thinking. Or, perhaps you are ready to experiment with a new medium for your content. Explore the video and microsite chapters to discover what the leaders in multimedia marketing are creating to share their story.

While we've included the industry each enviable brand is operating in, don't stay confined within your vertical. This guide is all about taking a step outside of your niche to expand how you think about inbound marketing.

But before we dive in, a warning. While some may say that copying is the highest form of flattery, see these examples as a means to your content genius, not the exact playbook. Keep your own persona and product in mind, and let the overarching strategy behind each example prompt your brainstorming. You might be surprised how an international supermarket could inspire your insurance firm's marketing, or how a backpack retailer could make you rethink content for your SaaS startup.

# SOCIAL MEDIA

# STARBUCKS

Starbucks was an early adopter of social media, and today continues to use beautiful visuals to give customers the longing for a warm cup of coffee. But aside from their photography, Starbucks' Facebook page includes a myriad of extra features including job postings, contests, and even an international app. Can't get that latte out of your head? Next time you're on the go, test out the store locator embedded right in their Facebook page.

Give thanks for the healthy kids in your life, and give to those who are not.

# ST. JUDE

St. Jude Children's Research Hospital understands the power of social media to raise awareness for a charitable cause. St. Jude's Facebook page features a "Donate" button directly on their cover photo to make the process as easy as possible. To encourage donating, St. Jude uses touching stories and photos of the children they support to connect givers with the heart of the organization.

# CHOBANI

When you have an extensive catalog of products, the potential for visual marketing is endless. But what about when you specialize in one product? Chobani is an excellent example of diverse photography for a single, simple item: a spoonful of yogurt. Check out Chobani's Instagram to browse colorful photos of fruit salads, pineapple smoothies, and frosted pumpkin cookies. You too might begin experimenting with all the tasty possibilities of greek yogurt.

# HERSCHEL SUPPLY CO.

There is nothing quite like Herschel Supply's Instagram account. Between mountaintop views and chaotic city streets, each one of their breathtaking photos communicates a story of travel and exploration. The best part? Most of Herschel Supply's posts come directly from their customers. By tracking the #WellTravelled hashtag, Herschel Supply has cultivated a community of followers and adventure-seeking artists. Warning: Overwhelming feelings of wanderlust may result immediately after following.

# SEWICKLEY ACADEMY

Even if you're new to the inbound marketing space, you've probably figured out the cardinal rule: Be helpful. As opposed to the intrusive nature of outbound marketing, inbound gains the trust of potential customers by creating content the audience actually wants. Check out the Pinterest account of Sewickley Academy, a college preparatory school in Pennsylvania, for an impressive collection of helpful content geared toward helping parents through one of the hardest decisions they have to make: where to send their child to school.

# L.L.BEAN

When your brand has been around since 1912, how do you keep product marketing fresh? Value the customer over the product. Take L.L.Bean's Pinterest account, for example. Instead of posting repetitive photos of their traditional (but oh-so-comfy) winter boots, L.L.Bean's boards feature stunning photos of sunrise hikes and crackling campfires. With this strategy, L.L.Bean follows Pinterest best practice by curating boards around the aspirations of their target customer.

# TACO BELL

If there is one part of your marketing where you should flaunt a bit of your personality, it's social media. Taco Bell's Twitter account is a prime example. With the brand's hand-drawn doodles of unicorns and tacos, you'll feel like you've opened one of your middle school notebooks. As quirky as it is, Taco Bell has still established a consistent brand image. Plus, the brand's creative use of animated GIFs results in a social strategy you can't help but love.

# EVERLANE

Each of Everlane's social media accounts work to break down the barrier between the customer and their favorite brand. By illustrating the how and why behind what they do, Everlane provides a window into company culture and differentiates themselves against similar fashion brands. As recent social media trends shift away from the public and toward the private, Everlane has done an exceptional job of using Snapchat to send messages to their customers that feel honest and personal.

# REI

As you work to raise brand awareness, often it's better to go a bit off the beaten path -- even if it means excluding yourself from the largest shopping day of the year. REI created its fair share social media buzz for Black Friday 2015 as they encouraged shoppers to #OptOut of their post-turkey trip to the mall and instead spend the day in nature. Yet, the holiday season is not the only unique social campaign REI launched. Check out their 1440 Project for an admirable example of inviting the customer into your social sharing.

Experience Giving and witness the impact of TOMS Shoes first-hand when you take a virtual journey to Peru. See the incredible work our Giving Partners are doing and meet some of the children who receive our shoes in this 360 video.

# TOMS

By sharing the stories of the people the brand supports, TOMS is able to quickly turn prospects into all-out brand evangelists for their one-for-one giving model. In

their latest piece of visual marketing, TOMS uses virtual reality to take the audience alongside on a giving trip. Drag the frame to get a 360-degree view of the surroundings. Better yet, tilt your smartphone for a seamless experience. As more brands discover the possibilities of virtual reality, expect for this form of video marketing to be around for a while.

# GOPRO

Pink gorilla jumping out of a plane? Check. Bird's eye view of a scenic canyon? That too. To experience a unique series of B2C video marketing, check out GoPro's YouTube channel. The brand curates videos from its customers to show just what heights and depths their product can withstand. In addition to featuring the product, the videos also create a community for GoPro users to share their extreme experiences.

# HOOTSUITE

Successful B2B marketers know the power of the case study. And especially for brands in the SaaS space, these success stories are often necessary to share the customizable nature of the product for the user. Hootsuite, creator of a social media management dashboard, uses video to highlight their customer's personality in each case study. Check out the series on their YouTube channel to see an impressive example of each part of the video process: interviewing, production, and editing.

# KLEENEX

For this marketing example, you might just need a box of tissues. Entitled “Best Friends,” Kleenex tells the story of a man who finds companionship in a dog who shares his same challenges. What makes this piece of content truly remarkable is the lack of explicit advertising for the brand itself. Instead, Kleenex uses its platform and name recognition simply to share a worthy story and inspire audiences.

# WISTIA

You'd expect a video hosting platform to excel at video marketing. Yet, it's not simply the lighting and lack of jump cuts that makes this an enviable marketing example. Wistia's video library consists of self-service tutorials to help businesses create awesome marketing. But before you pass this off as another set of boring educational videos, take a look. Wistia's content is helpful, courteous, and honestly, fun to watch. Packed with humor, Wistia sets an example of engaging writing brands should aspire to emulate.

Cartel member José Gonzalo Rodríguez Gacha built the cartel's military arm, hiring British and Israeli mercenaries to train his men, and uniting with right-wing death squads and paramilitary groups battling Colombia's leftist guerrillas.

**PLATA O PLOMO**  
 Escobar's challenge was simple: "Plata o plomo" ("Take my silver or take my lead").

Finally, the Medellín organization used vast amounts of money to bribe law enforcement and government officials. The bribes were the criminal equivalent of legitimate businesses hiring lobbyists and paying regulatory fines. Although it meant handing over "a very sizeable share of their income" in bribes, Heymann says, it was simply a line item on the cartel's profit and loss statement. Of course, the bribes came with a not-so-subtle threat of violence. Escobar's challenge, oft repeated,

# SPOTIFY

Spotify's emails master the challenge of personalization. The music streaming platform only sends emails when the content will be helpful to the reader. By leveraging the user's music interests, Spotify crafts emails that make the recipient feel like they're being rewarded for listening to what they love. Plus, there are few better ways to start your morning than to receive a personalized email from Spotify saying one of your favorite bands has released a new album.

# BIRCHBOX

Birchbox is another example of a brand committed to personalization. By always rooting the content in sample and purchase history, the shopper can be sure each email they receive from Birchbox will be relevant to them. In addition to suggesting the right products, the voice of the copy is helpful and honest, always reminiscent of an email from your best friend.

# AIRBNB

Airbnb's email personalization strategy is based around anticipating customer needs. The vacation accommodation site tracks your search history and lets you know when additional rentals become available that you might be interested in. As shown above, you'll also receive perfectly timed emails suggesting you take the time to relax and recharge. Each email fits into their overall marketing campaign, #BelongAnywhere -- helping customers feel at home anywhere they might explore.
