

FLEXIBLE CONVEYOR SOLUTIONS FOR INCREASED AUTOMATION

Automation is the key to consistent, top-quality processed cannabis and hemp. The best way to consistently feed your M108S Trimmer or seamlessly move plant material to the next stage of processing are our Mobius conveyor solutions. Full automation means less people are required to process your harvest, reducing processing costs, the potential for product contamination, and the uncertainty associated with seasonal or temporary workers.

Mobius has several flexible conveyor options to help you achieve full automation, including our M108S infeed conveyor equipped with our custom conveyor guide for a consistently filled trimmer, to both smooth or stepped trimming and bucking outfeed conveyors. All Mobius conveyor solutions are customized to our equipment to ensure quick and easy set-up and cost-effective output.

KEY FEATURES

- Standard trimmer infeed conveyor for a consistently filled tumbler with less manpower
- Standard trimmer outfeed offers QC surface while moving processed material to next stage
- Stepped outfeed conveyor raises low material to ergonomic height for further processing
- Customized guides, rails, and castors for perfect fit with Mobius equipment
