

TUMBLER AND BRUSH WASHER

SQUEAKY CLEAN TUMBLERS FOR TOP-TRIMMED CANNABIS.

Trimming with the Mobius M108s is impressive. It offers unrivaled volume of trimmed cannabis or hemp at a quality that can't be beat. But no matter how awesome any mechanical trimmer is, people who use them know that cleaning between batches can be a time-consuming challenge. Whether trimming wet or dry, the resin that naturally builds up on moving parts can be difficult to remove.

The Mobius Tumbler & Brush Washer takes a sizeable bite out of cleaning your M108s Trimmer. Built from rugged stainless steel and powered by a 1/8 hp motor, the Tumbler & Brush Washer automatically cleans your AirThread Tension Tumbler and brush bar to a level difficult to achieve manually. Simply attach the tumbler and brush bar to the mounting points, add a mixture of warm water and your preferred cleaning solution to the basin, and switch the unit on. In 5 minutes your AirThread Tension Tumbler and brush bar will be deep cleaned to the same extent as soaking and scrubbing each item for 30 minutes.

SAVING TIME & MONEY

Properly cleaned trimming equipment improves overall product quality and reduces the chance of batch cross contamination. The Mobius Tumbler & Brush Washer is so easy to use and efficient that over 10 tumblers can be washed in the time it takes to clean one tumbler by hand. Automating this task saves time and money, and makes for a happier sanitation crew, improving employee retention.

KEY FEATURES

- Automatically cleans tumbler and brush bar to a level hard to achieve by hand
- Reduces total clean time to 5 minutes from 45 minutes
- Full Stainless-steel construction
- IP67 wash-down rated 1/8 hp motor
- Easy to access front-mounted controls with emergency stop
- 4 swivel castors with locks plus side-mounted handles for easy positioning
- 1.5" brass drain spout with hose for quick and easy dirty water discharge

THE RIGHT TOOL FOR THE JOB

An IP67, 1/8 hp waterproof motor powers the Mobius Tumbler & Brush Washer to cleaning perfection. Overfill holes clearly mark the ideal fill line for water and cleaning solution while ensuring the basin has the right amount of liquid.

The shrouded enclosure keeps hot surfaces away from the operator. Controls including a large emergency stop are within easy reach and a safety switch shuts the motor down when the lid is opened. Mounted to the underside of the washbasin is an integrated 1.5" brass drain spout with hose connection to easily empty dirty water. Four swivel castors with locks combined with side-mounted handles makes the device easy to move and position.
