

## Bulb Replacement for the D912 Projector

Step 1 – Remove the 2 screws located on the side of the projector.

Step 2 – You can now pop off the plastic covering and have access to the bulb assembly. Loosen the 2 screws that hold the bulb assembly in place.

Step 3 – Lift straight up with the small handle attached to the lamp assembly. You can now insert your new lamp and follow the reverse process to tighten all of the screws.
