

What makes us different

1. The new EA tool making waves in the market
2. Established in 2013, Ardoq represents the next generation of graph EA tools designed for ecosystem architecting
3. Ardoq's Enterprise Intelligence Graph automatically connects people, processes, applications, and data across business and IT ecosystems
4. Ardoq drives technology alignment with strategy and cross-functional collaboration so as to mitigate risk, uncover cost savings, and ensure businesses are compliant
5. With clear best-in-class usability and no-UI-learning collaboration modes for inputting data, as well as full-scale analytics access, Ardoq is redefining what EA tools are capable of
6. The only EA tool with 100% open meta models and 100% agility by design
7. Fully REST API-supported, and with the capacity to deliver data-driven drawings of anything
8. Leader in AI across EA and GRC tools

9. Full commercial scale, deploying AI in an EA tool for both Cloud and on-premises use

10. Ardoq is designed for those willing to break free of old conventions, and to do things better

The power to do more

Experience full-scale use of AI in Ardoq to:

- Auto-generate crowdsourcing surveys from any data model
- Auto-complete fields in-tool and in-survey for high-fidelity structured data collection
- Auto-update visual dive-in presentations, regardless of where they are deployed
- Perform continuous gap discovery with smart notifications (also to third party apps e.g. Slack)
- Find duplicated/synonymous data in data graphs for higher data coherence and quality
- Automatically adjust graph analytics to user's preferences
- Ability to answer complex business questions across multiple architecture domains using natural language by combining NLP with powerful graph search capabilities

Ardoq is 5*-rated on Gartner PeerInsights.

See below for some of our reviews.

"An exceptional EA Tool, but so much more..." 5*

- Senior Architect in the Energy and Utilities Industry (company size 1B - 3B USD)

"Out of the box implementation and immediate access to start developing real life concepts" 5*

- Security Architect in the Government Industry (company size <50M USD)

"Visualize the complexity and get the understanding you need" 5*

- Senior IT Adviser in the Services Industry (company size <50M USD)
