

## Vacancy Wire bond process engineer

---

### **Vacancy Wire bond process engineer at NedCard Wijchen**

Process development is an important part of NedCard's development strategy. The Research & Development (R&D) department of NedCard Wijchen is responsible for new and improved materials and the final processing of Wire bond production. Within this department a vacancy has arisen for an experienced Wire bond process engineer.

### **Job description**

#### **Responsibilities**

In the position of Wire bond process engineer you are responsible for optimizing, developing, qualifying and preparing the production of Wire bond processes and materials.

- You work independently as a member of the R&D team.
- A large share of your work takes place in our cleanroom on the machines and measuring equipment.
- In the cleanroom we work on the ESEC / BESI 3100+ Wire bonders.
- You take care of investigations, analysis of the results, technical project reporting, documentation and internal training.

#### **Profile of the ideal candidate**

- You have been working in a technical direction on HBO level (Bachelor level).
- Experience is an important element, an MBO+ level is minimally required.
- You have relevant knowledge and experience with performing Design Of Experiments (DOE), measuring, analyzing the results and reporting.
- You have operational experience with Wire bond machines.
- You have a number of years of work experience in a comparable job on the Wire bond process.
- You communicate easily with people inside and outside the organization.
- You can listen well, you are also good at asking questions and you are solution minded.
- You have a proactive and customer-oriented attitude with a 'hands-on' mentality.

#### **Our offer**

A unique challenge for a practically oriented engineer who wants to work in an international organization. We offer you the opportunity to develop your capabilities within the job and the organization.

- NedCard offers terms of employment matching your responsibility, experience and education.
- The employment contract is aimed at a full-time employment contract (40 hours/ week)
- International work environment
