

FUN ACTIVITY

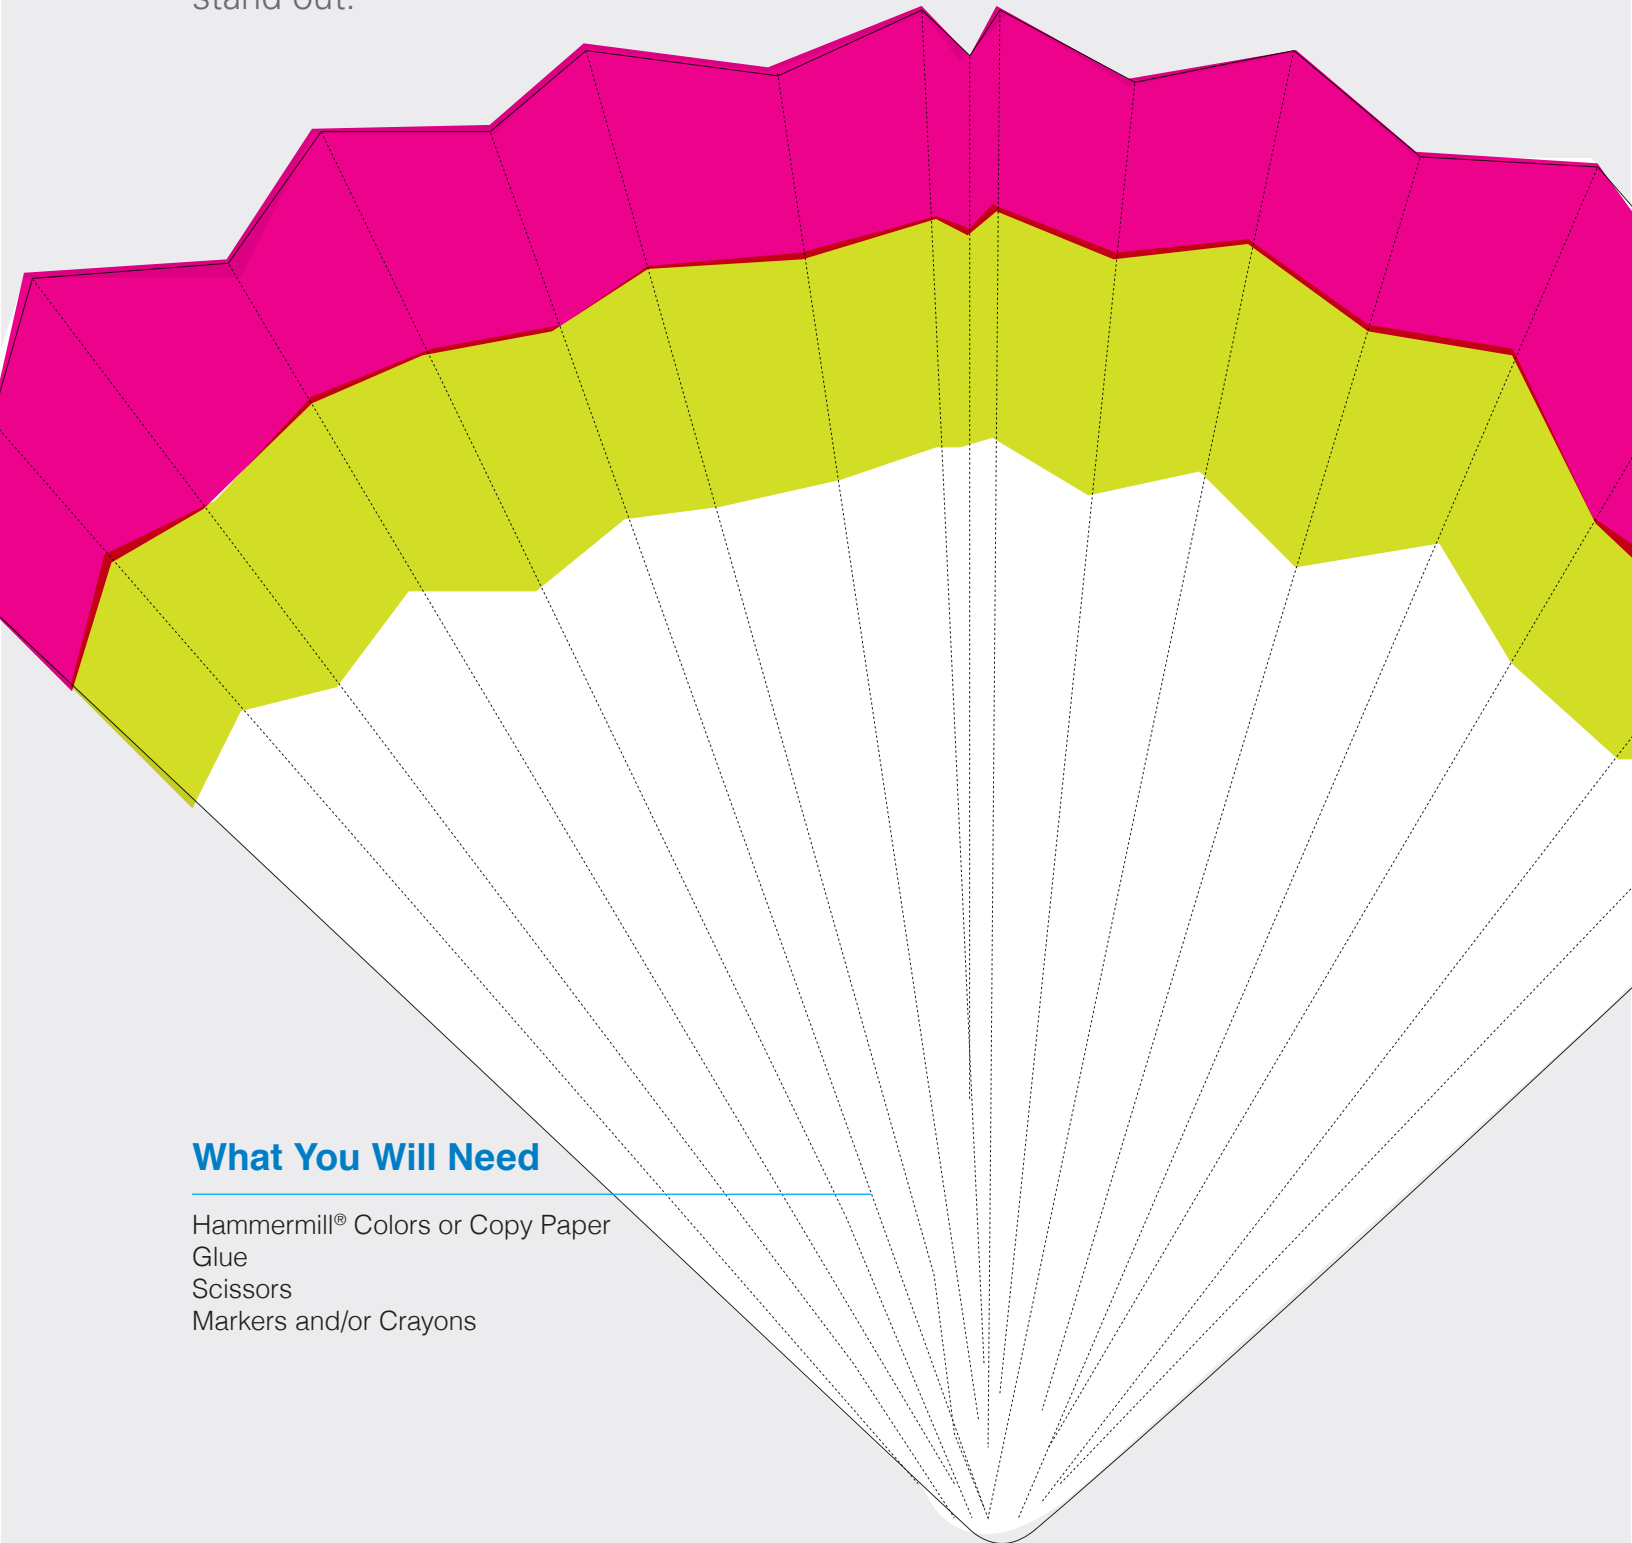

Paper Fans

Great for summer. Here's a simple, fun idea that can take a million different forms.

Paper Fans

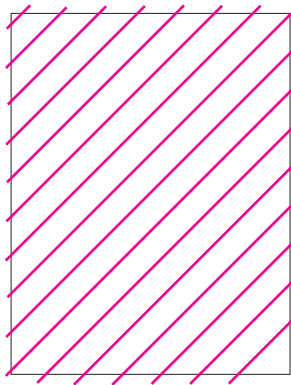

Get creative. Draw, create patterns, or add decoration to make your fan stand out.

What You Will Need

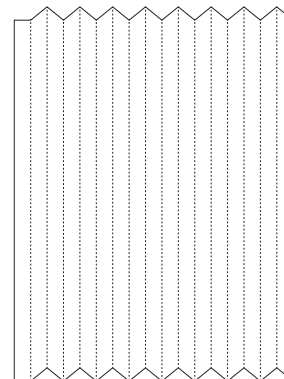

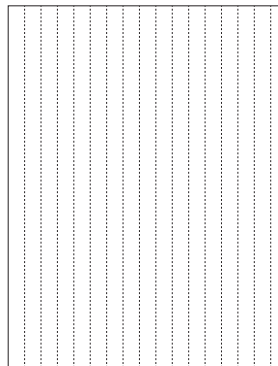

Hammermill® Colors or Copy Paper
Glue
Scissors
Markers and/or Crayons

How to Make a Paper Fan

Step 1

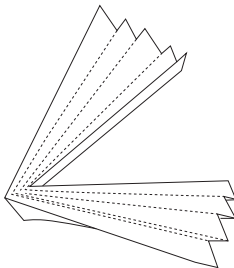

Color your fan, design patterns on it, cut patterns into it or draw a picture on your sheet of paper.

Step 2

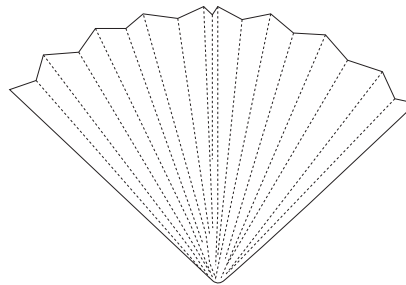

Vertically accordion-fold the paper in .25- to .5-inch widths. Flip the paper back and forth as you do so.

After you finish folding your paper, you should have one long rectangle. (Unfold your paper, and it will look like an accordion.)

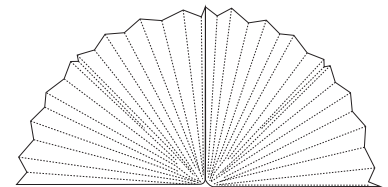

Step 3

Fold the paper in half.

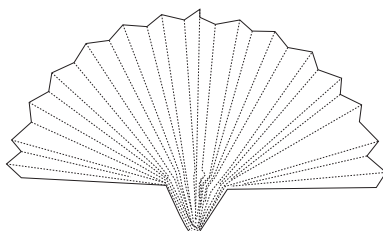

Step 4

Spread out the fan. Glue the two middle edges of the fan together.

Step 5

Repeat steps 1 through 4 using 1 to 2 additional sheets of paper. Connect the fans together using glue.

Step 6

Pinch together the bottom edge one inch from the base and fasten it together with a rubber band, glue, or strip of paper.
