See How Tricerat Stacks Up

Tricerat's solutions enhance the printing experience in Microsoft for administrators and end users alike. Easy Print only supports printing from printers redirected from a local workstation into a Microsoft remote session. There is no support for driver-less direct IP printers and no support option for print servers.

When it comes to our competitors, none can match the flexibility and functionality of Tricerat's solutions. We fit into any environment and immediately get to work. Our user experience is outstanding, and our support is world-class and standard with every single product.
