Simple installation that layers on top of existing environment without reboots		X
Easy self-service of printers via maps		X
Management of printers, drivers, and passthrough queues w/out add ons		X
No conversation of print job formatting		X

The Advantages of Tricerat

While Tricerat is not the only print management solution available, the advantages of Tricerat over competitors like UniPrint is clear. Tricerat offers access to the native driver UI so users can utilize all advanced print features without configuration. Unlike our competitors, which require their own bridge server, creating an additional point of failure, Tricerat sends jobs directly to print queues.

Tricerat is designed to simplify tasks for the administrator. Our software offers a drag and drop console for easier assignments, that can be deployed anywhere, allowing all management tasks to be done in a single interface.

When it comes to our competitors, none can match the flexibility and functionality of Tricerat's solutions. We fit into any environment and immediately get to work. Our user experience is outstanding, and our support is world-class and standard with every single product.

See why over 10,000 customers chose Tricerat:
