Expanded hardware support for Macs, thin clients, and mobile devices		X
Increased compression and encryption		X
Reporting		X
Citrix environment support		X
Microsoft RDP environment support		X
Hybrid environment support		X

See How Tricerat Stacks Up

Tricerat's solutions enhance the printing experience in VMware for administrators and users alike. With VMware and ThinPrint, the only supported printed is from printers redirected from a local workstation into a Horizon remote session. Also missing is support for driver-less direct IP printers and no support option for print servers. Tricerat's solutions offer all this, and more.

When it comes to our competitors, none can match the flexibility and functionality of Tricerat's solutions. We fit into any environment and immediately get to work. Our user experience is outstanding, and our support is world-class and standard with every single product.
