COVID-19: Best Practices for Deploying Telehealth

Coronavirus (CoV) are a large family of viruses that cause illness ranging from the common cold to more severe diseases. COVID-19 is a viral respiratory illness caused by a coronavirus. Transmission of the virus can happen quickly and have critical impact on the elderly and individuals with underlying conditions. Practicing basic prevention is essential to slow the spread of disease.

Symptom Overview

High Fever

Cough

Sore Throat

Headache

Basic Prevention

Frequently Wash Hands (30 seconds)

Avoid All Unnecessary Contact

Cover Your Mouth When Coughing or Sneezing
