## Area Calculator

## Best Bricks \&Pavers

## Find the square metres of your paved area

## Triangles

To find the area of a triangle, multiply the base by the height, and then divide by 2 .
$1 / 2 \times b(m) \times h(m)=m^{2}$
Example:
$6 \mathrm{~m} \times 6 \mathrm{~m}=36$
$36 / 2=18 \mathrm{~m}^{2}$

Rectangles

To find the area of a rectangle, multiply the base by the height.
$b(m) \times h(m)=m^{2}$

## Example:

$5 \mathrm{~m} \times 4 \mathrm{~m}=20 \mathrm{~m}^{2}$

Odd Shaped Areas

To find the area of an odd shape, break the shape into sections and add the areas
together.

## Example:

Area A: $2 \mathrm{~m} \times 3 \mathrm{~m}=6 \mathrm{~m}^{2}$
Area B: $6 \mathrm{~m} \times 5 \mathrm{~m}=30 \mathrm{~m}^{2}$
Area C: $1 / 2 \times 6 \mathrm{~m} \times 6 \mathrm{~m}=18 \mathrm{~m}^{2}$
Total area: $6+30+18=54 \mathrm{~m}^{2}$
