Award Winner

Mark Goldsmith
WAL-MART
Environmental Compliance
Director

Terry McMains
Published Author

Team E. J. Prescott has assembled a world class lineup of featured speakers who will discuss The Future of Stormwater Management in education track #2. Dr. Michal Kravcik, visiting from his native Slovakia, will discuss his innovative approach to stormwater management. Michael Harding has established himself as a world leader in erosion control innovation. Mark Goldsmith is Environmental Compliance Director for one of the world's largest corporations and Terry McMains has many years of hands-on experience on major stormwater projects nationwide.

STORMWATER FIELD GUIDE

This field guide is intended to help solve some of the basic stormwater related problems encountered on job sites. The goal of this manual is to provide useful and timely information on total job site management.

Inside the guide you'll find:

- **Sediment Control**
- **Erosion Control**
- **Ground Stabilization**
- **Site Drainage**
- **Pollution Prevention**

Check out our website to preview the guide and find out how you can get your copy of the **STORMWATER FIELD GUIDE** today!

2017 Seminar Schedule and Information

“The atmosphere was low stress and informal. All speakers were willing to talk with us and not at us. From the moment I walked in I felt encouraged to feel welcome and comfortable with the education received.”

Water Operator, Indiana

Track #1: Creating Clean Drinking Water with Effective Planning, Execution and Maintenance

America's drinking water industry faces tremendous challenges and they must be addressed now. Our entire water system infrastructure is aging and significant investment must be made in upgrades and replacement programs. At the same time, an aging workforce is draining water utilities of experienced and talented employees.

This course is designed to provide water operators with a blueprint for needed upgrades to our water system infrastructure. Water system designers and operators can expect to be brought up to date on the latest in new technology and innovative best management practices.

Session leader Tom Carr has over 35 years of experience in the drinking water industry and understands the challenges faced by today's operator. Tom and our presenters look forward to supporting attendees with great presentations and open discussions about issues they are facing.

Track #2: The Future of Stormwater Management

Nearly a half century ago, The Clean Water Act changed the rules in the United States regarding land use and watershed protection. This landmark legislation created a huge demand for new and improved best management practices and technology.

As the stormwater management industry has matured, innovation and change have come quickly. The site management toolbox continues to expand at a rapid rate.

Dr. Michal Kravcik, Mark Goldsmith, Michael Harding and Terry McMains will headline a track that will examine the past, present and future of stormwater management, drainage, and erosion and sediment control. With a focus on challenges ahead, this track will provide a detailed map of the core sustainable practices essential to our future.

Peter Hanrahan will lead this session. Peter has more than 38 years of industry experience and is excited to bring this incredibly talented speaker lineup to our 10th round of Know H₂Ow educational seminars.

10 PROGRAM

8:00 - 9:00 AM	Reg/Exhibits/Continental Breakfast
