OUR FUSION RENTAL EQUIPMENT

**McElroy - Rolling 412**
4” IPS - 12” DIPS - *Gas Powered*

McElroy’s Rolling 412 was the first fully self-contained fusion machine in the world.

**McElroy - Rolling 28**
2” IPS - 8” DIPS - *Generator Required/Electric Powered*

Its ease of use and rugged quality construction opened the door for the most extensive line of 8-inch fusion machines on the market.

**McElroy - Pit Bull® 14 and 26**
*Generator Required/Electric Powered*

These compact, light weight, rugged and highly reliable machines incorporate McElroy’s patented centerline guidance system and are capable of butt fusing tees, ells and other fittings.

**McElroy DataLogger 5®**

Document the pipe fusion process for increased accountability and keep a comprehensive, archival record of your entire job.

**GF Piping Systems - Electrofusion Machines**
*Generator Required (up to 6500W)*

These easy to use electrofusion machines are as durable as they come. The high-end components and custom configuration will support your workflow perfectly.

For more info, contact Team EJP - Fort Wayne at 260-482-2100 or visit us at 4620 Hillegas Road, Fort Wayne, IN 46818
At Team EJP, we are fully equipped and ready to handle all your Polyethylene pipe and fittings fusion work. Our service personnel are factory certified and trained in the proper procedures for using both heat fusion and electrofusion to form strong and durable joints with Polyethylene pipe.

It’s proven that proper fusion procedures will yield strength characteristics comparable to the pipe itself. In essence, the fused pipe sections become a single piece of pipe.

**WHEN IT COMES TO POLYETHYLENE PIPE FUSION, TEAM EJP STANDS READY TO ASSIST YOU**

From ½” to 36” Pipe, TEAM EJP has the tools and expertise to get the job done right.

**OUR PIPE FUSION SERVICE INCLUDES**

- Fusion machine, generator, hand tools and other necessary equipment
- Butt fusion
- Electrofusion
- Data Logging
- Experienced, insured personnel to perform fusion procedures
- Our OSHA Trained Service Technicians carry their 30hr card to ensure a safe, efficient completion of your project

Team EJP can handle all of your fusion work including the complete pipeline. We can also fabricate special fittings, adaptors, standpipes; anything made of polyethylene.

**PIPE FUSION TRAINING**

Through onsite educational programs, our Service Team offers a wide range of training in all aspects of the pipeline industry. Our HDPE fusion certified and trained Service Technicians can instruct your crew on using the proper procedures for both polyethylene butt fusion and electrofusion. Contact Chris Wehr for more info!

**TEAM EJP Service Technician - Fort Wayne, IN**

Christian (Chris) Wehr
