HOW IT WORKS

The Vitals™ app allows users to maintain a personalized profile that can be voluntarily shared with law enforcement and other first responders.

Each Vitals™ individual is assigned a Vitals™ beacon that transmits a private and secure signal to authorized first responders that are within 80 feet, allowing them temporary access to critical information.

First responders are notified in real-time and are automatically given the information to best interact with individuals.

OUR PROUD PARTNERS

ausm autism society of minnesota · The Arc Minnesota · PACER CENTER CHAMPIONS FOR CHILDREN WITH DISABILITIES · EPILEPSY FOUNDATION · HWMR · THE SANNEH FOUNDATION

Saving lives together.

Vitals™ Aware Services is introducing a new innovative service to Minnesota communities that will save lives and make our community safer.

Vitals™ is collaborating with its founding partner Autism Society of MN as well as the Arc Minnesota, PACER Center, and the Epilepsy Foundation of MN to build awareness and sign up people for its services.

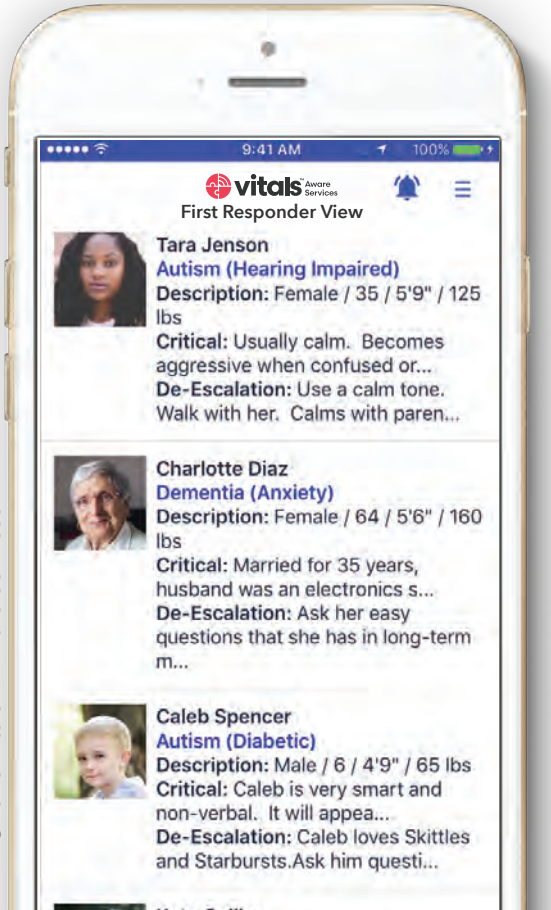
INTRODUCING

The Vitals™ App

Vitals™ is a new app that helps protect people with visible and invisible conditions and disabilities by voluntarily communicating critical information in real time to law enforcement and first responders.

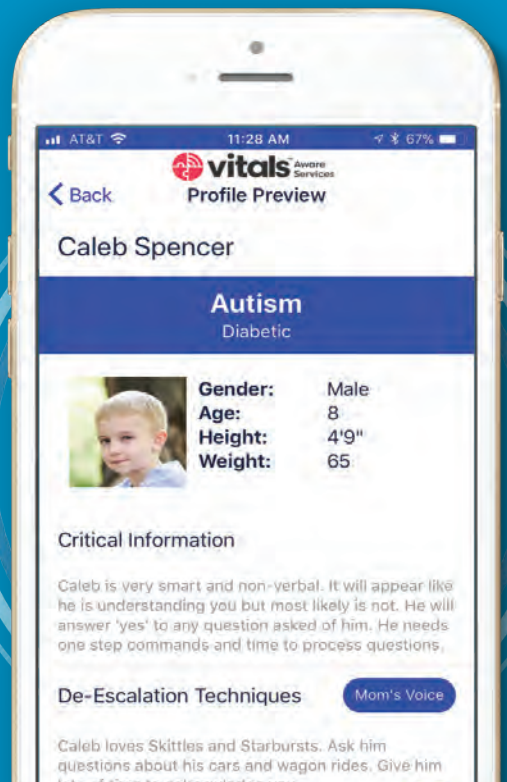
- Increases safety
- Improves communication
- Promotes independence



©2018 Vitals™ Aware Services

Vitals™ helps keep people safe

- Enhances interactions for individuals with invisible and visible conditions and disabilities.
- Closes the information gap and provides real-time information provided by the individual and caregiver.
- Empowers individuals to be more independent and increases peace-of-mind when out in the community.



We believe in using technology for social good.

We believe in building technology that saves lives and protects communities.

We believe we all have a role in making the world a safer place.

OUR VISION

To create technologies that save lives, improve public safety and connect communities around the world.
