

WHO WE ARE

A pioneer and leader in outpatient addiction medicine, CleanSlate is a national medical group that provides physician-led, office-based treatment for individuals suffering from opioid and alcohol use disorders. Founded in 2009 in response to the growing opioid epidemic, CleanSlate has grown to become an industry leader in high-quality, evidence-based care, providing medication-assisted treatment and related therapies to those suffering from the chronic disease of addiction. CleanSlate's large footprint of centers is growing rapidly to meet the demand for its medical services in states struggling with the opioid crisis throughout the country. OUR APPROACH

Opioid and alcohol addiction are chronic brain diseases that respond well to treatment based in science and provided by medical experts. As such, the CleanSlate program of care begins with individualized treatment plans for each patient. CleanSlate physicians properly prescribe a variety of outpatient addiction medications, including buprenorphine and naltrexone; and a full team of licensed medical professionals ensures that these medications are properly managed. We coordinate with additional local healthcare partners to ensure that patients receive a full spectrum of care that includes clear accountability and psychosocial interventions.

TOGETHER WE SUCCEED

CleanSlate understands that the only way to successfully combat the opioid epidemic and the disease of addiction is by collaborating side by side with community partners. We work diligently to forge relationships and team up with other healthcare providers, counseling centers, health insurance networks, government officials and local communities to coordinate in this fight. Together with our partners, we are expanding access to care in communities across the nation.

**I highly
recommend this
place if you're
serious about
becoming sober.
I have never met
a more caring,
dedicated group
in my whole life.**
