

## Polarcirkel Crossover bracket

**NEW!** Polarcirkel introduces a new Crossover bracket which can be mounted onto a 160mm diameter upright, and can clamp 90mm to 150mm diameter pipes.

The Polarcirkel crossover bracket is easy to install onto a pen: Simply place the bracket round an upright and lock into position with screws.

### Mounting ducting pipe for electrical cables

Old feed pipes can be used for this purpose. But Akva can supply new coils of Ø 90 / 150mm SDR17 pipes. We recommended one crossover bracket at every second upright.

### Lice skirt mounting rail

Using one crossover bracket per upright a Ø 90 / 150mm lice skirt suspension rail can be fixed along the circumference of the pen. It is beneficial to mount the skirt 20-30cm above the water line.

### Feed pipe mounting

The crossover bracket is perfect as a feed pipe mounting bracket. You will need one crossover bracket per upright.

## Polarcirkel Crossover bracket

### Easy installation

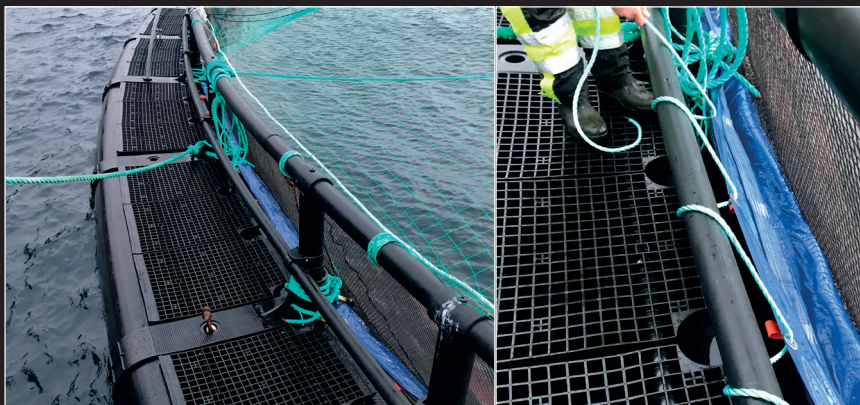

**1** Place the lower crossover clamp around the upright and lock into position using screws.

**2** Place the crossover U clip over the Ø90 / 150mm pipe and lock it onto the lower crossover clamp.

**3** Place the upper crossover clamp around the upright, slide it over the crossover U clip, press upper and lower clamp together and lock the upper crossover clamp into position using screws.

The Polarcirkel Crossover bracket is a robust and user friendly accessory that makes everyday life on the pen a little easier!
