

AKVA Net Cleaning System

Rugged Stainless Steel soundproof cabinet, Integrated Centrifugal Suction pump, High Pressure Pump and remote control for raising and sinking the washing rig.

It is extremely important to keep the weight of the cages light in cold periods. Icing and fouling can indirectly cause breakdowns and serious damages.

New Large Flow "Multi-Disk" Net Cleaning Power

Having listened to our customers worldwide we have taken a number of your suggestions and incorporated them into our latest system with new features:

Prattisoli Pump – Seawater specification simplistic design and easily maintained.

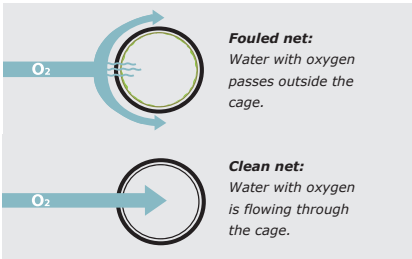

High Water Flow – Increased cleaning speed, more cages cleaned per day.

Choice of flow rates – to suit customer requirements or site conditions.

Improved control system – more feedback to the operator gives confidence that all is going according to plan.

- **Custom built to suit your needs**
- **Integrated Hydraulics**
- **External Winch**
- **Remote Control**
- **Addition options coming**

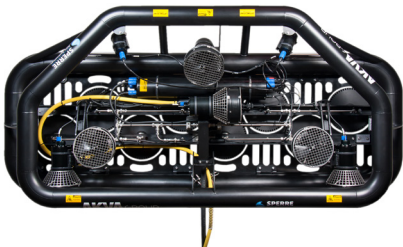

AKVA Net Cleaning System

It is proven that increased marine fouling leads to reduced water flow. As a result, the oxygen rich water will mostly flow around the cage.

The width of the cleaning path Net Cleaner range from 30cm, up to 290cm with the largest model using 10 washing discs.

Flying Net Cleaner - a new safe, powerful Net Cleaner that is easy to operate. Can be operated both remotely at the cage and from the control room.

AKVA group is the world ´s leading supplier of aquaculture technology, promoting well known brand names such as: Wavemaster, Polarcirkel, Fishtalk and Akvasmart.

The newly developed system comes with all the good features our Customers have come to expect from AKVA group Scotland Net Cleaners including:
