

SmartEye 360 Twin

Easily operated camera that provides sharp underwater video images even in dark light conditions.

SmartEye 360 Twin is an advanced double feeding and inspection colour camera with unique features. Being highly light sensitive, the camera will deliver excellent video images even when filming down into deep and dark cages.

The camera is easily operated via AKVAconnect. The pan/tilt modules provides 360° horizontal overview and 180° vertical control. Combined with winch systems, SmartEye 360 Twin provides excellent insight into the feeding response and condition of your fish.

The SmartEye 360 Twin has a 720p Top Camera and a 720p Bottom Camera with a Ultra Low-Light lens. The cameras connect to base via CAP (Cage Access Point).

The new SmartEye 360 Twin camera outperforms all comparable cameras on the market, with ultra-sharp colour images catching every detail.

Key features

- Ultra-low light (ULL) camera - providing excellent video images in deep and dark cages
- Sharp colour and/or monochrome images
- Synchronized for 360 degrees movement
- Easily operated with one joystick
- No external moving parts - prevents leaks and reduces the need for service
- Available with built-in depth- and temperature sensor

SmartEye 360 Twin
