

Meet Decoply

THE VIBRANT SHOWSTOPPER

Decoply is a laminated plywood product made exclusively in Plyco's Melbourne manufacturing plant. Designed for those seeking a hard wearing laminate surface, Decoply panels are made to order through bonding the stunning high pressure laminate (HPL) colours in our Décor range onto our [European Birch Plywood](#).

Tailored for shop fitting, cabinetry and joinery applications, Decoply lies at the intersection of design and practicality. A product in Plyco's Tabletop Plywood Collection, Decoply is commonly seen in laminate bench tops, cabinets, tables, book shelves, desks, counter tops and picture framing. It is available as both in both full sheets and cut to size.

Technical Specifications

Available Sizes

Decoply is available as a standard size in 2400mm x 1200mm sheets. With a thickness of 0.8 - 1mm depending on the laminate, when pressed onto our famous 18mm Birch core the approximate thickness is 19mm.

Available Substrates

While Decoply pairs the strength of European Birch Plywood with the timeless beauty of a HPL face, our Décor range of laminates can be pressed onto a number of other substrates, including MDF and Particle Board.

Made To Order

In addition to the standard 18mm Birch Plywood core, Decoply is also available as a Made to Order product with a Birch Plywood substrate thickness of 4, 6, 9, 12, 15, 24 or 30mm.

Custom Laminates

If you're seeking a laminate beyond our extensive in-store selection of six, we also have the capacity to use any commercially available laminate upon request.
