Overview

Bus Éireann is a transport operator founded in 1987 with its main headquarters based in Dublin city centre. The company's main services are within the Republic of Ireland directly and in Northern Ireland in association with the Ulsterbus. These services include intercity services, commuter, local and school services throughout. City services are also undertaken in a certain number of cities across the Republic of Ireland, including Athlone, Galway & Sligo.

Bus Éireann required a comprehensive time & attendance solution that would suit their specific requirements in terms of security, usability and improve their operational effectiveness.

A software partner with in-house capabilities and a strong understanding of the unique access requirements of the retail industry was required to ensure a future-proof solution was identified & installed with minimal disruption to Bus Éireann day to day activities.

Location

Multiple sites across Ireland

- Kaba BWeb 9320
- Kaba BEco

Favourite Feature

Time & Attendance

Capturing Employee Data with TDS

With a reputation for building industry specific access control solutions tailored to meet individual client requirements, TDS (Time Data Security) was selected as the project partner to implement a time & attendance solution for Bus Eireann.

The leading national bus company has selected both the Kaba B-Eco and B-Net 9320 terminals to effectively record personnel attendance. The hardware terminal deployed in Bus Eireann guarantees a convenient and reliable business data collection with minimum effort and maximal saving potential.

The TDS workforce solution is a proven solution for deploying human resource applications throughout Bus Eireann. Monitoring quality, timescale and business parameters, it ensures a cost effective and “on-time” delivery of TDS Workforce.

TDS set the standard for high-quality time and enterprise data recording products with the TDS Workforce solution. The time and attendance solution offer essential recording capabilities of a facility including briefings and room bookings along with enhanced data collection features transferring real data of the facility in real time. These systems create transparency, enhance production processes and raise productivity with the task of data collection and recording for an organisation

It is important that the implementation process across Bus Eireann is controlled, scheduled and ultimately successful. TDS has implemented several hundred time & attendance projects and experience has taught that the initial planning stage is pivotal to the success of any project. To that end, we have developed an implementation methodology and approach that will ensure a successful and secure project completion for Bus Eireann.

“By providing a centralised repository of all employee information, the TDS Workforce solution has enabled Bus Eireann to take a comprehensive view of our employee data”

Margie Walsh
Project Manager
TDS (Time Data Security) Ltd

Challenges

- The solution was required to adhere to the strict security measures associated within a HR environment
- Accurately capturing employee data
- Full integration capabilities with third party hardware/software

Benefits

- ✓ Capture accurate staff information that reduces error internally
- ✓ An automated time & attendance system allows Bus Eireann to improve operational costs i.e. spend less time on payroll
- ✓ Prevents “buddy punching” and other time theft
- ✓ Fully customisable solution that fully integrates with existing & proprietary solution
