Cineworld Dublin, selects best-in-class Time & Attendance software from TDS

125 Biometric clocks installed

9946 Employees

2017 Customer Since

Location

◎ Parnell Street, Dublin

Systems Installed

- TDS Time & Attendance

Hardware Installed

✓ *9320 KABA Biometric time recoding clocks

Overview

Cineworld Group plc is the second largest cinema operator in Europe with 2,049 screens across 221 sites in 9 countries. Cineworld is the second-largest cinema operator in the UK with over 800 screens, and the owner of the single largest multiplex by screens and customer base in Ireland.

Cineworld Dublin is the biggest cinema in Ireland, with 4 floors and 17 screens. It is located on Parnell Street, Dublin and is owned by the Cineworld cinema chain. The cinema also contains a bar, shop and ticketing area. In 2012 screen 17 on the top floor was refurbished to support digital IMAX (smaller, lower resolution than 70mm IMAX film).

Cineworld came to TDS with the need for our integration software to enable their existing time clocks to communicate with their new CoreHR Software. Their 3rd party hardware supplier that provided the original clocks could not provide Cineworld with the necessary software to integrate with CoreHR which made the clocks obsolete and unfit for purpose with their new CoreHR Management Software. TDS offered a needs analysis and provided all the solutions for Cineworld including new software and hardware.

TDS Time & Attendance

Capturing Employee Data with TDS

With a reputation for building industry specific access control solutions tailored to meet individual client requirements, TDS (Time Data Security) was selected as the project partner to implement a time & attendance solution for Cineworld.

The leading cinema has selected our KABA Biometric time recording clocks to effectively record personnel attendance. Cineworld stated the biometrics function that TDS provide was an important part of the future of avoiding clock fraud. The hardware installed guarantees a convenient and reliable business data collection with minimum effort and maximal saving potential.

The TDS workforce solution is a proven solution for deploying human resource applications. Monitoring quality, timescale and business parameters, it ensures a cost effective and "on-time" delivery of staff data. This then streamlines payroll management and reporting. The system further benefits from TDS Analytics, an automated reporting tool designed to present data in user friendly format for enhanced decision making and data analysis.

The service will facilitate future growth while reducing upgrade costs with single software upgrades automatically rolling out across all sites.

Cineworld were also under tight timeframes regarding the delivery of clocks, TDS successfully configured and rolled out 125 Clocks to different locations in under 3 weeks, our quickest delivery to date. This was accomplished with the help of our dedicated Project Managers, managing clients' criteria of budget requirements and proposed timescale.

> *"The benefits with our clocks is the integrity of the time capturing, you can be sure that there will be no buddy punching or time fraud for Cineworld. This is a very positive step going forward for Cineworld"*

TDS (Time Data Security) Ltd

Challenges

- Upgrading T & A clocks from obsolete hardware

- Requirement for a simple integration into CoreHR

- Tight timeframe (3 weeks)

Benefits

- ✓ Integration with CoreHR software which offers a single sign on interface

- ✓ Data protection

- ✓ Prevents "buddy punching" and other time theft via biometrics

- ✓ Fully customisable solution that integrates with existing & proprietary solution
