

ADVANCED INTEGRATION NOW AVAILABLE

FOREFLIGHT DISPATCH REAL TIME FLIGHT PLANNING

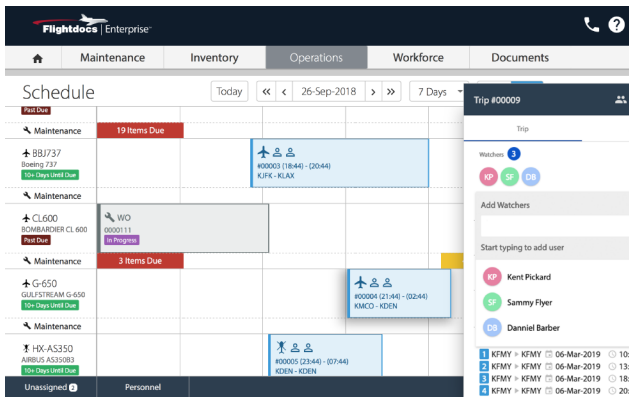

BRINGING LEADING EDGE FLIGHT PLANNING CAPABILITIES TO FLIGHTDOCS ENTERPRISE

The ForeFlight Dispatch integration complements Fd | Operations™ by incorporating a top-tier flight planning engine and electronic flight bag capabilities, reducing redundant data entry and improving your operational efficiency, resulting in a fully integrated trip support system.

- Leverage a full flight planning engine for determining ETE calculations.
- Automatically deliver trip leg information to ForeFlight Dispatch in real time.
- Eliminate redundant airport code and aircraft information entry.

ForeFlight
A Boeing Company

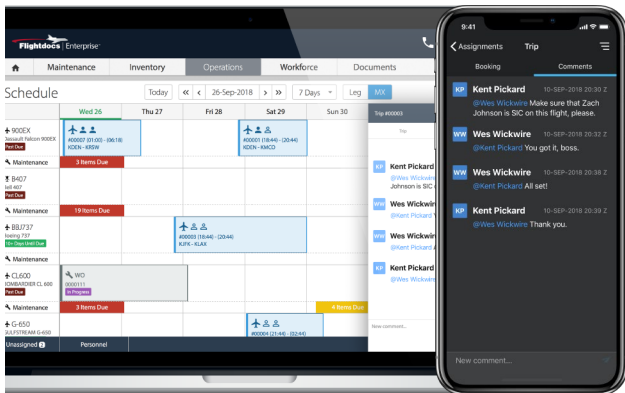

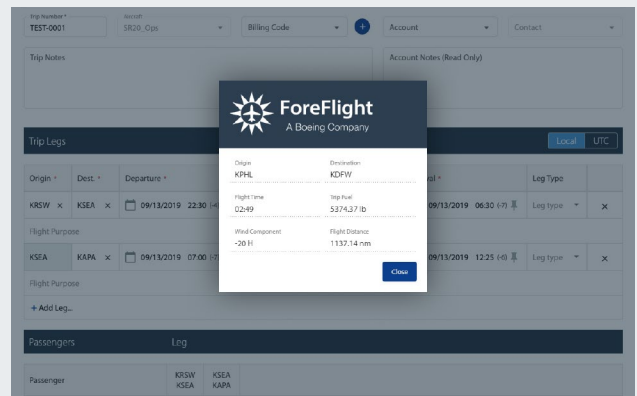

BENEFIT 1 FULLY INTEGRATED SYSTEM

Complete and integrated flight department management system that includes flight operations, maintenance tracking, inventory management, and flight planning.

BENEFIT 2 IMPROVED PLANNING

Top-tier flight planning engine that delivers accurate key calculations based on real time fuel burn data, weather conditions, airport and route statistics, and other metrics.

BENEFIT 3 STREAMLINED DATA ENTRY

Whether a dispatcher using the web app or a pilot utilizing the iOS app, all data entry is centralized, synchronized, and intelligently automated to eliminate common errors.
