

# 10 Features

*Every Training Provider Will Love*

1

## Your Training on One Dashboard

SkillsPass provides you with a clear line-of-sight to your customers and individual trainees. One glance at the big picture to tell you your top customers, courses taught, what each instructor teaches, and more so you can grow your business strategically.

2

## Print or Re-Print Certificates with One Click

Automated record keeping gets rid of the stacks and stacks of manually inputted records, so pulling a worker's training records on our secure cloud-based system is effortless and printing it just as easy.

3

## Employer Access to SkillsPass

Your clients (Employers) have the ability to access their Workers' Certs via their own SkillsPass database. Your clients receive access as soon as you issue the digital certificate.

4

## Notifications, Notifications, Notifications!

Ensuring workers remember when class is, informing them of a schedule change, and most importantly, ensuring their training does not expire is made easy with SkillsPass notifications. SkillsPass notification engine empowers the right communication with your customers.

5

## Easy to Re-Certify with the Original Training Provider

The SkillsPass Training Provider module enables trainers to manage classroom scheduling directly on the platform. So when a certification is due to expire and a notification is sent, SkillsPass provides a simple and intuitive way to schedule retraining right then and there with YOU their preferred training provider.

# 6

## One Network

SkillsPass is the first central database to track and share safety training records starting with you the Training Provider. Your training records in SkillsPass empowers transparency for employers, unions, workers, and regulators that is required to take safety to the next level.

# 7

## Public Storefront With eCommerce to Sell Seats Online

What are you going to do with all that extra time you save on record keeping? Train more workers of course! SkillsPass provides Training Providers with the ability to fill vacancies by advertising their classes on their website while automatically managing seats and bulk reservations for employers. Workers in need of training can search for courses by name, type, and geographic location right on your website.

# 8

## Immediate Digital Access - Anytime, Anywhere

When you issue the certificate, workers can view it on their phones immediately. SkillsPass issues every worker their own unique QR code in the system. Anyone who scans this code can get a complete picture of that worker's certifications in real-time. It is printable but also accessible by phone; a wallet card they won't lose easily.

# 9

## Empowering Workers

SkillsPass assigns every worker their own profile. Instead of reducing credentials to some line item entry on some spreadsheet somewhere, their credentials really belong to them. So they can move from employer to employer knowing that their training goes with them.

# 10

## Records Automatically Upload to Government Regulators

SkillsPass is a solution for the entire safety training ecosystem. That means employers, training providers, workers, unions, and yes, even regulators. SkillsPass makes it possible for you to automate reporting to participating regulators and authorizers. You can spend less time on reports and more time on the workers, their training, and the work you do together.
