

Ketra's Natural Light solution creates a nourishing living environment for families through spaces that are healthy, safe, and completely customizable.

"The benefits of lighting that helps us sleep, improves our mood, reduces depression, or makes us feel more alert on the job are, simply put, priceless."

Mariana G. Figueiro, PhD, Lighting Research Center

Aesthetics

- Light beautifully renders finishes and textures to always look their best
- Bright and vibrant during the day, warm candlelight in the evening

Health

- Eliminates blue light exposure at night, which helps regulate sleep cycles
- Healthy sleep patterns enhance overall physical and emotional wellness

Convenience

- Use pre-curated content selected by experts or set your own custom scenes
- Use Ketra wall stations or mobile app to control all the lights in the house
- Integrates with leading home automation systems, Crestron and Lutron

Safety

- Night light level dimming provides subtle glow for hallways and stairs at night
- Control all interior and exterior lights with one button before entering or from your bedside
- Integrates with leading home security systems

Integrated Fixtures D4R and D3 Downlights Retrofit Lamps S30, S38, and A20 Lamps

- Lamps screw into standard light fixtures
- Wireless control adjusts brightness and color
- Tunable white from warm to cool
- Select from infinite color options
- 50,000+ hour lifetime, longer than average home ownership

X2 Keypad

- Keypads replace standard wall switches, providing more choices in each room
- Compatibility with standard faceplates makes for an easy install
- Powerful enough to control all the lighting in your home
- Up/down arrows dim to 0.1% brightness
- Pre-programmed circadian lighting along with other content options selected by lighting experts

N4 Hub

- Creates a bridge between installed lighting and digital interfaces
- Built-in astronomical time clock
- Allows for wireless control of up to 50 lights and keypads
- Multiple hubs cascade to support larger networks

Mobile App

- Instantly change lighting from anywhere within your home WiFi network
- Available through the App Store and Google Play for phones and tablets

Crestron and Lutron Integration

- Easily integrates with existing home controls
- Recall scenes or shows, or change intensity and color of individual light groups
