

## Al's Super Suds Success Story

### The Client

Al Collini, owner of Al's Super Suds Car Wash in Melville, NJ, realized that his parking lot was a mess and that he needed to fix it fast. The constant wear and tear of traffic and water, combined with oil and gas stains, was creating cracks everywhere and he knew if he didn't act quickly, the driveway would be beyond repair.

### The Challenge

With so many problems on the large parking lot area, Al knew hiring a contractor would be prohibitively expensive. He needed to get the products and equipment to do the job himself. What's more, he knew that if he did the job himself it would be done more thoroughly and completely than if he outsourced it. What he needed was high quality products and equipment.

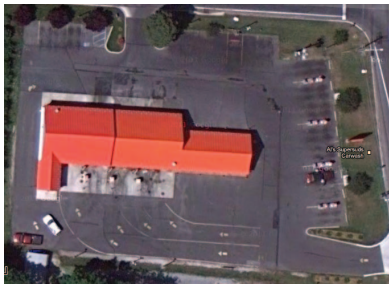

### The Asphalt Kingdom Solution

Asphalt Kingdom had just what Al needed to stop the deterioration and save the parking area. Al purchased the AK10 Crack Repair Machine and 18 boxes of hot pour rubberized crack filler, and began the job. He was instantly sure he made the right decision: "It was much easier than I thought it would be! Filling cracks is not hard at all with the right tools. The Ak10 makes it easy to fill cracks whenever and wherever."

### Looking Forward

The experience was so good that this spring, Al will be investing in a sealcoating sprayer and asphalt seal coat product. The cracks are filled and the damage is stopped, so he can apply sealer to create another layer of protection and a nice uniform color to improve the overall look of the parking lot. It will make it easier to maintain in the future as well. His experience was a "10 outta 10" at Asphalt Kingdom.
