

## Auto Wash Express Success Story

### The Client

Mark Janezik is the proprietor of 8 Auto Wash Express car wash facilities across the state of Arizona. In business for over 30 years, he knows that maintaining a good-looking property is a great way to keep customers happy.

### The Challenge

As with everything, prices are going up for asphalt maintenance, and costs were so high this year that Mark found himself looking online for ways to save money. Having watched contractors do the work every two years for the last three decades, he was confident his crew of four could do the work with no trouble.

### The Asphalt Kingdom Solution

Since he had 8 properties to maintain with varying issues, Asphalt Kingdom suggested a complete sealcoating package including an asphalt blower, a spray system, a crack repair machine, asphalt sealer and crack filler. Although he knew doing the work himself would be cheaper than outsourcing it, Mark was concerned with the quality of products available in his area. Once he received all the asphalt maintenance equipment and supplies, he was glad he had spent the time to talk to Asphalt Kingdom. "The quality of the equipment and supplies is good or better than anyone out there," Mark said, "and ordering online was easy and convenient."

### Looking Forward

Having all the tools he needs to deal with any asphalt issue that comes up, Mark is happy that he can get off the two-year-sealcoating cycle he was on and instead proactively maintain each of the 8 properties as they need work done. The cost savings and convenience make it much easier on the business to stay on top of property repairs, and Asphalt Kingdom will be his go-to source for supplies in the future.
